this book focuses on the data mining and knowledge management implications that lie within online government provided by publisher this book analyses the exponential growth of independent news portal inps in malaysia and discusses the extent of impacts generated from these portals in malaysian electoral conduct especially during malaysia s 12th and 13th general elections the mainstream media in malaysia has for decades been controlled by strict laws such as the printing presses and publications act pppa and the sedition act as well as self censorship by print and broadcast journalists and editors the rise of inp in malaysia has challenged this government stranglehold as well as making information available much faster than the mainstream media the undeniable speed of the news posted on inp which often come with interactive contents are seen to have caused a remarkable increment on public s options with regards to expressing their political views some of the inps have also impressively taken up a notch by providing live streaming videos or interesting online visual news which indirectly unifies various sectors of pressure groups in providing options of circulating and disseminating information to the public the interviews conducted for this book provide deeper insights from those producing news and at the same time provide a specific and thorough observation on

political events including representatives of the Malaysian middle class opposition parties youth and university students NGOs and civil society movements Chinnasamy investigates key questions relating to this shift in relation to media preference concerning on the mainstream and political landscape in Malaysia Did the INP evolve new democratic movement in the country or induce a change in the way the government retains its power by increasing people's active engagement in political participation Did any revolution in government managed media landscape occur drastically if so how did they accomplish these changes This book will fill the gap of existing research on how far have the INP empowered themselves to be the third force in fighting democratic movement in the country and how the ruling government continues seeing it as a contention as foreseen by many experts in the industry Key and enabling digital tools and solutions can boost the digital transformation of economies and societies and support achieving the Sustainable Development Goals SDGs by 2030 The outcomes of digital innovation must be in line with responsible research and innovation How can advanced information technologies including artificial intelligence blockchain edge computing the next generation of the Internet of Things (NGIoT) IoT machine learning and robotics create digital tools and solutions to build more resilient climate neutral and green economies and societies 5G artificial intelligence and next generation Internet of Things digital innovation for green and sustainable economies offers innovative conceptual frameworks and theories case studies and empirical studies to understand digital innovation and how digital and industrial technologies can accelerate the digital and green transition with multidisciplinary and transdisciplinary approaches The book studies how digital tools and solutions can impact the achievement of the Sustainable Development Goals (SDGs) worldwide focusing on the Asian region featuring research on topics such as 5G artificial intelligence blockchain circular economy green economy climate neutral economy human centered approach robotics geographical focus and methodologies This book is ideally designed for academics researchers industry players policymakers students academics experts on it CEOs policymakers and other relevant stakeholders worldwide The Biennial Digital Review of Asia Pacific is a comprehensive guide to the state of practice and trends in ICT for development (ICT4D) in Asia Pacific carrying 31 updated country reports on the theme of ICT and education

this book investigates the impact of internet use on anti government protesting under authoritarian rule by breaking up the causal chain into various steps it provides a thorough and nuanced understanding of internet s role in different stages of the mobilization process it argues that the impact of internet use on anti governmental protesting differs per step in the mobilization chain and also that the effect depends on both the on and offline repression of the regime as well as on the type of internet that is available while staying far away from any technologically deterministic claims about the internet the book demonstrates that the internet especially plays an important role in the early stages of the mobilization process by exposing citizens to alternative political information online internet users are more likely to become sympathetic towards anti governmental protest movements diverse contributors explore the impact of the internet in the asia pacific region this book provides relevant theoretical frameworks and the latest empirical research findings in the area of information technology as it relates to sustainable economic development and the development of knowledge societies provided by publisher this book unites the theoretical underpinnings and scientific methodology of an approach of deploying ict in marginalized communities to bridge the so called digital divide this book contains case studies of asia africa latin america and the caribbean that demonstrate which approaches work and which do not in deploying public access to information sources provided by publisher no miracle examines the role of institutions in bridging the digital divide between rich and poor nations and what that means for the country s integration into a global economy shifting the debate from whether institutions are important to economic development to which institutions are important and how to build them mitchell wigdor expertly addresses fundamental shortcomings in the existing development literature by identifying specific institutions that mediate the relationship between information and communications technology ict and economic growth in doing so he challenges those concerned with development to shift their gaze from whether institutions are important to economic development to which institutions might be the focus of government efforts and how to build them detailed case studies of the economic development strategies of singapore and malaysia from 1960 demonstrate that institution building and economic development may be as much

about process as the specific policies governments pursue written in accessible non technical language this book should be read by everyone concerned with economic growth both in less economically developed countries and the more prosperous including those in government international organizations ngos universities policy makers and the private sector bakri musa makes a persuasive argument for malaysia to embrace globalization with conviction it is the ticket to her vision 2020 aspirations malaysia was well on her way to join the global mainstream when the 1997 economic crisis interrupted that trajectory it is now time the writer passionately pleads to return to that path yes there are sandbars and reefs together with the inevitable storms and swells in the ocean of globalization this calls for skillful navigators and sailors ready to trim the sails and batten the hatches the alternative would be to remain in port not an attractive option the writer offers specific prescriptions on how best to meet those challenges from enhanced health care to superior education system and by exposing malaysians to greater competition as islam is a pervasive influence in malaysia the writer calls for an enlightened interpretation of the faith one more in tune with its ideals of tolerance for diversity reverence for learning and a passion for trade the writer draws lessons from as far away as argentina and as far back as the ancient muslims and from sociology to biology the perspectives offered here are refreshing departures from the wisdom currently emanating from kuala lumpur digital literacy concepts methodologies tools and applications presents a vital compendium of research detailing the latest case studies architectures frameworks methodologies and research on digital democracy with contributions from authors around the world this three volume collection presents the most sophisticated research and developments from the field relevant to researchers academics and practitioners alike in order to stay abreast of the latest research this book affords a vital look into digital literacy research this book examines the problem of inadequate access to information and communication technology ict and the need to develop appropriate pro poor ict policies within the latin american and caribbean context the authors show how market reforms have failed to ensure that the benefits of the information society have spread across the many social and economic divides that characterize the region the authors explain and support the formulation of a new perspective

on ict access and develop an analytical framework with which to assess the critical variables involved in effective ict adoption in developing regions the research supports policy reform that builds upon the achievements of market liberalization efforts in the region but which must also address the realities of cydigital povertyoco oco a concept that grasps the multiple dimensions of inadequate levels of access to ict services by people and organizations as well as the barriers to their productive use this is the first publication of the regional dialogue on the information society dirsi a regional network of leading researchers concerned with disseminating knowledge that supports the participation of marginalized communities using icts in latin america and the caribbean the book will be of interest to anyone interested in icts and international development policy and practice there is no question that technological advances in the early twenty first century have ushered in a new kind of freedom that makes products and ideas available to groups of people all over the world nevertheless there is a large gap between those who have access to information and communication technologies such as the internet and those who do not in global e litism gili s drori expertly explores this global digital divide and simultaneously examines the cultural and political processes contributing to the growing technological disparity between developed and developing countries and the worldwide implications of these processes this book constitutes the refereed proceedings of the second international conference on online communities and social computing ocsc 2007 held in beijing china july 2007 in the framework of the 12th international conference on human computer interaction hci 2007 it covers designing and developing on line communities as well as knowledge collaboration learning and local on line communities the five volume set ccis 1832 1836 contains the extended abstracts of the posters presented during the 25th international conference on human computer interaction hci 2023 which was held as a hybrid event in copenhagen denmark in july 2023 the total of 1578 papers and 396 posters included in the 47 hci 2023 proceedings volumes were carefully reviewed and selected from the 7472 contributions the posters presented in these five volumes are organized in topical sections as follows part i hci design theoretical approaches methods and case studies multimodality and novel interaction techniques and devices perception and cognition in interaction ethics

transparency and trust in hci user experience and technology acceptance studies part ii supporting health psychological wellbeing and fitness design for all accessibility and rehabilitation technologies interactive technologies for the aging population part iii interacting with data information and knowledge learning and training technologies interacting with cultural heritage and art part iv social media design user experiences and content analysis advances in egovernment services ecommerce mobile commerce and digital marketing design and customer behavior designing and developing intelligent green environments smart product design part v driving support and experiences in automated vehicles extended reality design interaction techniques user experience and novel applications applications of ai technologies in hci the media ecology within which conventional mainstream journalism currently operates has undergone major transformations since the advent of social media these transformations arise from the disruption brought upon by the emergence of networked interactive platforms and user driven online applications including social media blogs and alternative citizen news sites this book analyses networked forms of journalistic production at traditional news organizations and their conventional news channels focusing on case studies from malaysia it examines current transformations to the norms practices and values of conventional news production drawing upon a recent global comparative turn in journalism studies and parallel efforts to de westernize communication theory this book suggests an innovative glocal comparative approach to analyse network newswork among global transnational and local news organizations including al jazeera and bernama tv located within the same geographical locality kuala lumpur malaysia this author uses an empirically grounded conceptual framework for exploring and understanding recent transformations that user driven networked resources bring to professional journalists daily work of producing news discussing the implications of network newswork on the wider global journalistic sphere the book elucidates a tiered model of networked sources and expounds upon journalism s deepening of the digital divide in its inadvertent muting of the voices of non networked communities that are switched off from the global news sphere and its network society a fresh perspective on the analysis of globalization in the media and a useful guide for gaining access into media organizations and securing cooperation of organizational members

for research this book will be of interest to researchers in the field of asian media and communication studies journalism studies political communication and sociology of journalism the biennial digital review of asia pacific is a comprehensive guide to the state of practice and trends in information and communication technologies for development ictd in the asia pacific region this fourth edition 2009 2010 features 30 economies and four sub regional groupings the chapters provide updated information on ict infrastructure industries content and services key programs enabling policies and regulation education and capacity building open source and research and development initiatives as well as ictd challenges in each of the economies covered the common framework that underpins these reports allows readers to undertake a comparative analysis and assess progress across asia pacific in addition regional overviews provide a synthesis of ictd trends regulatory issues and lessons for managing innovation in the network economy the thematic chapters focus on issues in ict in education a key area in ictd the authors are drawn from government academe industry and civil society providing a broad perspective on the use of icts for human development the proliferation of new information technologies throughout the world has raised some important questions for policymakers as to how developing countries can benefit from their diffusion this important volume compares the advantages and disadvantages of the it revolution through detailed studies of a variety of developed and developing nations and regions argentina estonia the eu india japan korea mexico south africa thailand and the usa there is widespread concern that the internet is exacerbating inequalities between the information rich and poor the digital divide reflects a gap in telecom access not lower propensity to use the internet in poor countries promoting access for poor households will help but pro competitive policy holds the key to rapid progress in narrowing the divide this work compares it parks in china india malaysia singapore taiwan and hawaii in search of strategies that policy makers can employ to reduce the global digital divide advance distributional equity and soften some of the negative effects of economic globalization this book discusses increasing the participation of women in science engineering and technology professions educating the stakeholders citizens scholars educators managers and policy makers how to be part of the solution provided by publisher the dot com revolution has

brought many advances before unimagined of them all it may be said that none have surpassed e government in attracting a significant number of researchers and practitioners from around the world however the question remains whether everyone is ready to join the e government movement or if some are just blindly following the latest trend digital solutions for contemporary democracy and government touches on several key issues and challenges surrounding the recent e government boom and offers practical solutions from those who have been a part of implementing e government programs internationally due to its breadth of discussion on a variety of topics relating to the intersection of technology with politics democracy and government this authoritative book is a valuable reference source for professionals researchers and students in the field of e government information management or knowledge management
