Kemp: Passage at Arms 2018-04-23 this book presents new technologies which are available now for the rehabilitation of

visual acuity in patients suffering from keratoconus and for arresting the progression of this frustrating disease all these current treatment options in differing combinations aim to improve the quality of life of the patients and although successful they are causing confusion for the ophthalmologists what procedure to do and when how to perform which combination of treatments to choose controversies in the management of keratoconus provides the widely used treatment options for keratoconus including collagen corneal cross linking cxl covering all the available techniques intrastromal corneal ring segments icrs phakic intra ocular lenses iols photorefractive keratectomy prk combined or not with cxl penetrating keratoplasty pk and deep anterior lamellar keratoplasty dalk each treatment is addressed by more than one author with different points of view in order to present the various approaches the logic behind them and the most relevant clinical data available a chapter by the editor tries to put some light on how to navigate among these controversies this book will be of interest to trainees as well as the specialized ophthalmologists

Good with His Hands

La Selva 1994-03-18 issues including climate variability water scarcity animal welfare and declining biodiversity have led to increasing demands on farmers to conduct and communicate their farming practices so as to protect their social licence to farm farmers are increasingly expected to demonstrate their social and environmental responsibility as a pre condition to being allowed to carry out their preferred farming and commercial practices current examples include the live animal export trade battles over protection of aquifers from mining and contests over rural carbon emissions in defending the social licence of farming authors from australia the usa europe and iceland document the diverse issues associated with the social licence to farm they provide examples of different sectors strategies and experiences and give specific indications of what is

involved in coping successfully with this political and legal dimension of farming as resources become scarce and society's expectations more diverse and demanding farming can expect that social licence issues will become both more difficult and more important the book suggests that the old models of response largely focused on defensive positions will often be insufficient to protect the interests of both farmers and the community this book will provide a useful stimulus for innovation and proactive policies to defend the social licence of the farm sector

Land Resources Monitoring, Modeling, and Mapping with Remote Sensing 2015-10-02 the industrial revolution mechanization water and steam power computers and automation have given an enormous boost to manufacturing productivity faster better cheaper in the history of manufacturing shows how the ability to make products faster better and cheaper has evolved from the stone age to modern times it explains how different developments over time have raised efficiency and allowed the production of more and better products with less effort and materials and hence faster better and cheaper in addition it describes the stories of inventors entrepreneurs and industrialists and looks at the intersection between technology society machines materials management and most of all humans faster better cheaper in the history of manufacturing follows this development throughout the ages this book covers not only the technical aspects

mechanization power sources new materials interchangeable parts electricity automation but organizational innovations division of labor fordism taylorism lean most of all it is a story of the people that invented manufactured and marketed the products the book shows how different developments over time raised efficiency and allowed production of more with less effort and materials which brought us a large part of the wealth and prosperity we enjoy today the stories of real inventors and industrialists are told which includes not only their successes but also their problems and failures the effect of good or bad management on manufacturing is a recurring theme in many chapters as is the fight for intellectual property through thrilling tales of espionage this is a story of successes and failures it is not only about technology but also about social aspects ultimately it is not a book about machines but about people

Kiss Me Crazy 2017-10-24 as soon as i saw him it was war i thought at first it would be between me and him cade was cold and hard and didn t want anything to do with the headmaster s daughter i was off limits he didn t need that kind of trouble i didn t need that kind of trouble either and since i did my best to avoid any kind of trouble that should have been the end of it but when i saw him he also saw me all of me the lonely parts the dark parts the secret parts he became my ally i lost the battle with myself and fell in love despite the risk but the war isn t over for either of us not as long as my father is alive

Second Growth 2014-05-23 technology and globalization are threatening manufacturing s traditional ability to deliver both productivity and jobs at a large scale for unskilled workers concerns about widening inequality within and across countries are raising questions about whether interventions are needed and how effective they could be trouble in the making the future of manufacturing led development addresses three questions how has the global manufacturing landscape changed and why does this matter for development opportunities how are emerging

trends in technology and globalization likely to shape the feasibility and desirability of manufacturing led development in the future if low wages are going to be less important in defining competitiveness how can less industrialized countries make the most of new opportunities that shifting technologies and globalization patterns may bring the book examines the impacts of new technologies i e the internet of things 3 d printing and advanced robotics rising international competition and increased servicification on manufacturing productivity and employment the aim is to inform policy choices for countries currently producing and for those seeking to enter new manufacturing markets increased polarization is a risk but the book analyzes ways to go beyond focusing on potential disruptions to position workers firms and locations for new opportunities worldbank org futureofmanufacturing
