North Fayette Comprehesive Plan 2014 2019-10-17 many companies have a complex process for purchasing software that is required by it projects or better by the business usually software is

purchased by a centralized procurement function and is either purchased on a project by project basis or as a large periodic software contract unfortunately purchasing software products does not automatically mean that these products are exploited throughout the organization providing the maximum possible value to the business units several issues call for a structured approach that gets the most business value out of software already purchased the objectives of this approach are to create maximum awareness throughout the organization of the software purchased track software use in it projects and act if products are not used at all used improperly or insufficiently used facilitate use of software products in projects especially when software products are complex and require a lot of integration we can summarize the overall objective of this approach as ensuring that the business units in an organization obtain the maximum possible value of software products purchased which is also the scope of this ibm redbooks publication

CIO 2011-10-25 a key question for china which has for some time been a leading global manufacturing base is whether china can progress from being a traditional centre of manufacturing to becoming a centre for innovation in this book shang ling jui focuses on china's software industry and examines the complete innovation value chain of software in its key phases of innovation standards definition development and marketing he argues that except for software development these key phases are of high added value and that without adopting the concept of independent innovation as a guiding ideology china's software enterprises like india's would have an uncertain future in other

words the lack of core competence in the development of china s software industry might restrain the industry from taking the leading position and drive it towards becoming no more than the software workshop of multinationals over the long term shang ling jui contends that china s software industry should and can possess its own complete innovation value chain having worked in china s software industry for many years the author provides an inside out perspective identifying the strengths and weaknesses of the industry and defining the challenges in china s transition from made in china to innovated in china
