are given for reference building trust in diverse teams supports humanitarian practitioners human resource departments and regional and head office emergency professionals as they improve team effectiveness during an emergency and ultimately improve their ability to save lives this paper addresses the puzzling decline of total factor productivity tfp levels in rapidly growing economies such as singapore despite advancements in technology and high gdp per capita growth the paper proposes that tfp growth is not negative instead standard growth decompositions have underestimated tfp growth by overestimating the contribution of capital failing to account for the substantial part of capital income directed to urban land rents this leads to an overestimation of changes in capital stock s contribution to growth and thereby an underestimation of tfp growth a revised decomposition suggests that tfp growth in economies with high land rents and rapid capital stock growth such as singapore has been considerably underestimated tfp levels have not declined but increased rapidly connections maths 9 stage 5 3 5 2 5 1 together with connection s maths 10 stage 5 3 5 2 5 1 provides complete
