Our Toxic World, a Wake Up Call 2004-01-01 the colossal scale of world war ii required a mobilization effort greater than anything attempted in all of the world s history the united states had to wage war across two oceans and three continents and to do so it had to build and equip a military that was all but nonexistent before the war began never in the nation s history did it have to create or transport and supply huge armies navies and air forces on so many

distant and disparate fronts the axis powers might have fielded better trained soldiers better weapons and better tanks and a but they could not match american productivity the united states buried its enemies in aircraft ships tanks and guns in this sense american industry and american workers won world war ii the effort was titanic and the result historic not only did it determine the outcome of the war but it transformed the american economy and society maury klein's a call to arms is the definitive narrative history of this epic struggle told by one of america's greatest historians of business and economics and renders the transformation of america with a depth and vividness never available before

idea was it to put the fate of the world in the hands of someone without a fully developed prefrontal cortex in never too old to save the world nineteen authors explore what would happen if the chosen one were called midlife what would happen if the chosen one were a soccer mom a cat lady a nosy grandmother a social worker a retiree an aging swordmaster the chosen one could be anyone because when the universe calls the real question is whether the hero will take up the mantle and answer their midlife calling sometimes the world needs a hero who's already been through thick of chaos and survived in those cases age does matter

Never Too Old to Save the World 2014-07-08 the world was last designed seventy five years ago about the same time that sam pitroda was born this design has outlived its utility hyperconnectivity and the covid 19 pandemic offer a unique opportunity to redesign the world to take humanity to the next level redesigning the world is not about looking at it from the point of view of liberal or conservative left or right capitalism or socialism public or private democracy dictatorship or monarchy open or closed systems rich or poor urban or rural east or west white black or yellow this proposed redesign of the world has the planet and its people at the centre it is built on the foundations of sustainability inclusion equality equity and justice so that everyone on earth can enjoy peace and prosperity it is not an idealist or utopian vision but one with humanity at its core this book is about reshaping the world to meet the future challenges of our planet our people the three dimensions in the third vision he calls for nations networking ideas interests resources and talent all designed to save our planet and uplift all our people this vision will be based on a novel organizational architecture focussed on global consultations collaboration co operation and enhanced communication he lays out what he sees as the three dimensions of the information age connectivity content and context there is reference to three unique dimensions of information technology democratisation decentralisation and demonetisation then there are five new pillars for the world s redesign inclusion human needs a new economy sustainability conservation and non violence there are multiple valid points such as the need to discard the use of simplistic and inadequate tools such as gdp to measure economic growth and well being the book stresses on the need to keep environmental concerns central to any new policy making point

out that the planet can survive without people but people can survive without a healthy planet our priority during the world redesign has to be to improve our planet s health and make it clean diverse prosperous and sustainable a place where each and form of life can flourish and live to its fullest potential the most heartfelt section of the book is one at the end entitled am i to write this book in which he delves into his motives for penning this book the book offers a much needed manifesto that can guide the world to better healthier sustainable human life however in a bitterly divided world with governments turning towards populism nationalism and brutality to crush change political will at the highest level one the crucial elements that make the manifesto possible seems to be unachievable at the moment he urges us to recognise how covid has underscored interconnected we are but few seem to be able to recognise the least india currently facing unprecedented challenges to save lives as a manifesto a wish list for the next 75 years this is a wonderful even inspiring read the challenge is to make the power that be accept this vision

Between the World and Me 2022-03-15 the international bestseller beautifully told cnn a remarkable story worth retelling and celebrating usa today oh it s a good one fox news a beautiful of a brotherhood between enemies emerges from the horrors world war ii in this new york times bestseller by the author of devotion now a major motion picture december 1943 a badly damaged american bomber struggles to fly over wartime germany the controls is twenty one year old second lieutenant charlie b half his crew lay wounded or dead on this their first mission suddenly a messerschmitt fighter pulls up on the bomber s tail pilot is german ace franz stigler and he can destroy the young

american crew with the squeeze of a trigger what happened next would defy imagination and later be called the most incredible encounter between enemies in world war ii the u s 8th air force would later classify what happened between them as top secret was an act that franz could never mention for fear of facing a squad it was the encounter that would haunt both charlie and for forty years until as old men they would search the world for each other a last mission that could change their lives forever
