2020-05-24 defined by borders both physical and conceptual the roman city stood apart as a concentration of life and activity that was legally economically and ritually divided from its rural surroundings death was a key area of control and tombs were relegated outside city walls from the republican period through late antiquity given this separation an unexpected phenomenon marked the augustan and early imperial periods roman cities developed suburbs built up areas beyond their boundaries where the living and the dead came together in densely urban environments life and death in the roman suburb examines these districts drawing on the archaeological remains of cities across italy to understand the character of roman suburbs and to illuminate the factors that led to their rise and decline focusing especially on the tombs of the dead whereas work on roman cities has tended to pass over funerary material and research on death has concentrated on issues seen as separate from urbanism emmerson introduces a new paradigm considering tombs within their suburban surroundings of shops houses workshops garbage dumps extramural sanctuaries and major entertainment buildings

in order to trace the many roles they played within living cities her investigations show how tombs were not passive memorials but active spaces that facilitated and furthered the social and economic life of the city where relationships between the living and the dead were an enduring aspect of urban life

*Inhabiting Liminal Spaces* 2022-02-09 this book draws together debates from two burgeoning fields liminality and informality studies to analyze how dynamics of rule bending take shape in rome today adopting a multiscalar and transdisciplinary approach it unpacks how gaps and contradictions in institutional rulemaking and application force many residents into protracted liminal states marked by intense vulnerability by merging a political economy lens with ethnographic research in informal housing illegal moneylending unauthorized street vending and waste collection the author

shows that informalities are not marginal or anomalous conditions but an integral element of the city's governance logics multiple actors together construct the local cultural norms conventions and moral economies through which rule negotiation occurs however these practices are ultimately unable to reconfigure historically rooted power dynamics and hierarchies in fact they often aggravate weak urbanites difficulties in accessing rights and services a study that challenges assumptions that informalities are predominantly features of developing economies or limited to specific groups and sectors this volume's critical approach and innovative methodology will appeal to scholars of sociology and anthropology interested in social theory urban studies and liminality
