establishment of these foundations and their system of top down elitist scientific giving which focused more on managing social political and economic change than on solving modern society's structural problems consulting rare documents and other archival materials he recounts how the american intellectuals academics and policy makers affiliated with these organizations institutionalized such elitism which then bled into the machinery of u s foreign policy and became regarded as the essence of modernity america hoped to replace britain in the role of global hegemon and created the necessary political ideological military and institutional capacity to do so yet far from being objective the ford rockefeller and carnegie foundations often advanced u s interests at the expense of other nations incorporating case studies of american philanthropy in nigeria chile and indonesia parmar boldly exposes the knowledge networks underwriting american dominance in the twentieth century this book provides an introduction to the mathematical and algorithmic foundations of data science including machine learning high dimensional geometry and analysis of large networks topics include the counterintuitive nature of data in high dimensions important linear algebraic techniques such as singular value decomposition the theory of random walks and markov chains the fundamentals of and important algorithms for machine learning algorithms and analysis for clustering probabilistic models for large networks representation learning including topic modelling and non negative matrix factorization wavelets and compressed sensing important probabilistic techniques are developed including the law of large numbers tail inequalities analysis of random projections generalization guarantees in machine learning and moment methods for analysis of phase transitions in large random graphs additionally important structural and complexity measures are discussed such as matrix norms and vc dimension this book is suitable for both undergraduate and graduate courses in the design and analysis of algorithms for data the sumerians invented temple capitalism the assyrians made it multinational the phoenicians evolved controls the greeks leapfrogged with an entrepreneurial model that replaced it the romans perfected a robust blend of autonomy and regimentation that flourished for four hundred years foundations of corporate empire puts all this under a microscope richard t pascale associate fellow templeton college university of oxford foundations of corporate empire is a dreary title for a business book that turns out to be anything but it is in fact a sweeping yet remarkably readable history of globalization that marshals impressive evidence report on business magazine from the cradles of civilization to the corporations of global economy business empires have come and gone but the essence of economic enterprise has always been with us this is a world in which enterprises have been shaped as much by what they are as what they do and in which an understanding of where we've come from will aid our interpretation of where we can go every future has a foundation to be explored in this well researched and highly readable book moore and lewis persuasively argue that many of today's global economic institutions and structures are not as new as often proclaimed but the product of a long evolutionary process their conclusion that a historical perspective provides important clues about the future of globalization is thought provoking and worthy of broad debate cornelis a de kluyver dean peter f drucker graduate school of management this fascinating book should serve as a timely reminder to those who seem to think that tomorrow can be managed with scarcely a backwards glance to yesterday compulsive reading for businessmen and politicians sir david rowland president templeton college university of oxford foundations of corporate empire sketches the history of international business from the emergence of ancient assyria around 2000 bc through the phoenician carthaginian and grecian periods up to the time of the roman imperium under augustus and then on to the medieval and modern eras ending with today's post modern times the history of these civilisations has
