covers receipts and expenditures of appropriations and other funds around the turn of the millennium it had become painfully evident that development aid charity or global business as usual were not going to be the mechanisms to alleviate global poverty today there is little dispute that poverty remains the most pressing global problem calling for innovative solutions one recent strategy is the base of the pyramid bop concept developed by prahalad and hart which relies on entrepreneurial activity tapping into the previously ignored markets of the economically most disadvantaged it is a process requiring innovations in several disciplines technological social and business this book covers a number of areas first much of the current bop discussion emphasises targeting products to the needs of the poor but do we actually know what the real needs of the poor are this book takes a bottom up human centred approach and examines examples that truly engage the poor in bop product and service development what types of needs assessment methodologies are indicated considering the cultural differences in bop countries are the existing methodologies adequate do they need to be redefined and redeveloped second the book considers how we can balance poverty alleviation and stimulate economic growth without stressing the ecosystem tragically the poor are hardest hit by the adverse effects of environmental deterioration such as

water shortages climate change or the destruction of habitats while the economic welfare of the poor is critical the bop approach must balance its inherent paradox of encouraging greater consumption while avoiding further pressures on environmental sustainability the link between the bop approach and sustainable development is a key feature of this book third it looks at innovation and asks what kinds of bottom up innovation open source technological social and business support bop initiatives and sustainable development fourth the book deals with the relationship between development assistance and bop is a bop strategy the antithesis to development aid or can these two co exist or even complement each other finally the book raises questions about the relationship between corporate responsibility and bop is bop a new form of corporate neo colonialism or a new form of corporate responsibility although the bop concept has unleashed an extensive and generally enthusiastic response from academics businesses ngos and governments the knowledge domain around this concept is still in the early stages of development this book addresses that need with a focus on the needs of the end users the poor as a starting point for bop products and innovations with contributions from both supporters and critics it provides a treasure trove of global knowledge on how the concept has developed what its successes and failures have been and what promise it holds as a long term strategy for alleviating poverty and tackling global sustainability interest in sustainable green building practices is greater than ever whether concerned about allergies energy costs old growth forests or durability and long term value homeowners and builders are looking for ways to ensure that their homes are healthy safe beautiful and efficient in these pages are descriptions and manufacturer contact information for more than 1 400 environmentally preferable products and materials all phases of residential construction from sitework to flooring to renewable energy are covered products are grouped by function and each chapter begins with a discussion of key environmental considerations and what to look for in a green product over 40 revised this updated edition includes over 120 new products categories of products include sitework and landscaping outdoor structures decking foundations footers and slabs structural systems and components sheathing exterior finish and trim roofing doors and windows insulation flooring and floor coverings interior finish and trim caulks and adhesives paints and coatings mechanical systems hvac plumbing electrical and lighting appliances furniture and furnishings renewable energy distributors and retailers an index of products and manufacturers makes for easy navigation there is no more comprehensive resource for both the engaged homeowner and those who design and build homes there are some events in life that are inevitable and the emergence of problems in the workplace is one solutions sets out to provide remedies that are accessible practical meaningful and final well organized and referenced to specific operations this book provides troubleshooting and other assistance and serves as an encyclopedic reference for answers to organizational problems for managers and practitioners all the functional activities and operations of organizations are included so that almost any problem or issue that may occur will be addressed in one or more chapters readers will be able to quickly locate understand and use a specific tool or technique to solve a problem the different tools available are described or a single most useful tool indicated the tool is then explained in depth with an example of how it can be used the strengths and weaknesses of individual tools are identified and there are suggestions for further help solutions is essential for anyone wanting to learn the basics of business problem solving and those who might know the basics but want to expand their understanding as energy innovation becomes imperative for the environment and energy security the law must be fleet footed to evolve in an unwieldy area of policy this much needed text assembles experts to analyse the most recent developments and to postulate how human rights sustainable development and the eradication of energy poverty could be achieved in december 2011 and january 2012 scotland was subject to numerous storms that caused damage to homes road and rail infrastructure as well as leaving tens of thousands of residents without a power supply in some cases it took more than three days before power was restored although all of scotland was affected it appears that the most severe damage occurred in the highlands and islands the committee s inquiry focussed on the frequency and severity of weather related power cuts in scotland the consequences of such power cuts to individuals businesses and public sector services

the current condition and technological state of scotland s electricity transmission network and what conditions it is built to withstand the advantages and disadvantages of using an alternative electricity transmission infrastructure particularly regarding its vulnerability to weather related damage whether the response provided by the energy companies was satisfactory and how the regulation of transmission network operators and distribution network operators impacts upon investment in scotland s electricity transmission network the committee concludes that while blackouts following severe weather incidents can never be completely eliminated one way that they can be minimised is by ensuring that the grid is in a robust and well maintained state before any such incidents occur the increase in renewable energy generation also offers opportunities for networks to be less reliant on single vulnerable electricity lines to serve remote communities the value of compensation for loss of power currently offered and the conditions under which it applies should be improved this ibm redbooks publication describes how to implement an open platform for database as a service dbaas on ibm power systems environment for linux and demonstrate the open source tools optimization and best practices guidelines for it open platform for dbaas on power systems is an on demand secure and scalable self service database platform that automates provisioning and administration of databases to support new business applications and information insights this publication addresses topics to help sellers architects brand specialists distributors resellers and anyone offering secure and scalable open platform for dbaas on power systems solution with apis that are consistent across heterogeneous open database types an open platform for dbaas on power systems solution has the capability to accelerate business success by providing an infrastructure and tools leveraging open source and openstack software engineered to optimize hardware and software between workloads and resources so you have a responsive and an adaptive environment moreover this publication provides documentation to transfer the how to skills for cloud oriented operational management of open platform for dbaas on power systems service and underlying infrastructure to the technical teams open platform for dbaas on power systems mission is to provide scalable and reliable cloud database as a service provisioning functionality for both relational and non relational database engines and to continue to improve its fully featured and extensible open source framework for example trove is a database as a service for openstack it is designed to run entirely on openstack with the goal of allowing users to quickly and easily utilize the features of a relational or non relational database without the burden of handling complex administrative tasks cloud users and database administrators can provision and manage multiple database instances as needed initially the service focuses on providing resource isolation at high performance while automating complex administrative tasks including deployment configuration patching backups restores and monitoring in the context of this publication the monitoring tool implemented is nagios core which is an open source monitoring tool hence when you see a reference of nagios in this book nagios core is the open source monitoring solution implemented also note that the implementation of open platform for dbaas on ibm power systems is based on open source solutions this book is targeted toward sellers architects brand specialists distributors resellers and anyone developing and implementing open platform for dbaas on power systems solutions market based environmental instruments are the most creative of the many initiatives devised to combat air and water pollution and promote biodiversity among these none has attracted more attention than the burgeoning trade in environmental allowances and credits originally developed in the united states around 1990 these varieties of tradable instruments were globally validated by the kyoto protocol of 1997 which explicitly contemplates the buying and selling of environmental allowances and credits among both sovereign states and corporate entities despite u s opposition to the kyoto protocol global trading in pollution instruments is growing at an exponential rate with instruments representing over 70 million tonnes of greenhouse gas emissions estimated to have been traded in 2003 eco finance is the first in depth legal analysis of this extraordinary hybrid of environmental regulation and global financial markets it deals with what are currently the two dominant types of market based environmental instruments market traded environmental instruments which include the tradable pollution allowances envisaged by the kyoto protocol and environmental financing

instruments which include the emerging class of environmental and socially responsible investment funds among the numerous topics and issues treated by Ali and Yano are the following: the cap and trade regime, debt for environment swaps, forestry securitisations, greenhouse gas emissions markets, carbon funds and swaps, tradable green certificates, weather derivatives, duty to hedge climatic risks, catastrophe bonds, protected cell companies, the prudent investor rule, and ethical security indices. The authors deal searchingly with the critical legal issues that arise in connection with these market-based environmental instruments, such as the danger that courts might recharacterise underlying risk transfer agreements as illegal insurance products for this reason, and for its wealth of practical, theoretical, and informational detail, *Eco Finance* will be of enormous value to a broad range of legal, governmental, and business professionals, including environmental regulators, securities regulators, financial market professionals, institutional and other fiduciary investors, corporate risk managers, and investment fund managers, as well as practitioners and academics in both environmental law and financial law.

As the economy recovers, the stock market has soared, and you're looking for profitable places to put your money well. Search no further: the stocks listed in previous editions of this book have consistently beaten the market average by more than 6 percent. In addition to naming 100 top performing investments, this newest edition of this classic guide will tell you how to reduce risk, develop an investment strategy, evaluate value, know when to buy and when to sell, invest for retirement, whether you're a first-time stock buyer or an experienced trader. This quick reference volume remains your essential and trusted tool for building your investment portfolio. This book is a result of ISD2000, the ninth international conference on information systems development methods and tools, theory and practice, held August 14-16 in Kristiansand, Norway. The ISD conference has its roots in the first Polish-Scandinavian seminar on current trends in information systems development methodologies held in Gdansk, Poland, in 1988. This year, as the conference carries into the new millennium, this fine tradition it was fitting that it returned to Scandinavia. *Velkommen tilbake* next year, ISD crosses the North Sea and in the traditions of the Vikings invades England. Like every ISD conference, ISD2000 gave participants an opportunity to express ideas on the current state of the art in information systems development and to discuss and exchange views about new methods, tools, and applications. This is particularly important now, since the field of ISD has seen rapid and often bewildering changes. To quote a Chinese proverb, we are indeed cursed or blessed, depending on how we choose to look at it. To be living in interesting times while the coronavirus disease COVID-19 has resulted in severe global health and economic crises, it also presents an opportunity for a green, sustainable, and resilient recovery enabled by sustainable energy. This guidance note examines the effects of COVID-19 on the energy sector in Asia and the Pacific. It looks at how the sector has responded so far and outlines key actions that energy stakeholders can take during the response and recovery phases. The guidance note also highlights how the Asian Development Bank's support to the energy sector is helping its developing member countries recover from the pandemic and achieve sustainable development.

Laxton's gives you access to the most reliable and current data. All 250,000 price elements have been individually checked and updated for the 2002 edition, so that your estimates are always accurate and cost-competitive. Laxton's makes analytical estimating simple and straightforward by displaying a complete breakdown for all measured items under 10 separate headings, all on a single page. This shows you a complete price build-up at a glance and gives you the option to make price adjustments wherever necessary. You can find the sections you need quickly and easily via the special marker system on the front cover and page edges. The free CD with this price book contains Masterbill's estimator software and fully resourced data on all the price elements in Laxton's. Not only does the CD offer fast and efficient pricing at the touch of a button, it gives details of all the resources required to do the job. Laxton's approximate estimating section gives all in pricing for quick reference on the cost of composite items, such as floors, helping you calculate the cost implications of using plywood sheeting rather than softwood boarding. For example, Laxton's basic price section gives you a quick price on hundreds of items, from concrete work to roofing materials, to save you going through hundreds of lists from suppliers, manufacturers, and building merchants. Laxton's brand and trade names section lists over 12,000 brands and trade names and company
