and it's easily the funniest thing we've read this year so far. *gq* drew magary's first posthumous novel is so good it's about big tech weird futures growing up and intriguingly for us the absurdity of on-demand global travel roads and kingdoms when the corporate monolith portsys brought porting to the masses. ceo emilia kirsch and her son jason accomplished what every other startup company had failed to deliver: they really did change the world. they reversed climate change, they created a multitrillion-dollar industry out of thin air, curing economic woes across the globe. they made it so that anyone could be anywhere simply by touching a screen, including the man who murdered sarah huff. now sarah's 17-year-old sister anna is determined to hunt the bastard down, but there are a few problems: she doesn't know who the killer is or where in the world he may be at any given moment. also, she's stuck at prestigious druskin academy, where portphones are banned and any student who attempts to port off campus is immediately expelled. it gets stickier: anna's also fallen in love with her dazzling new roommate, who just so happens to be emilia kirsch's daughter, lara. the dean of students wants anna dead, perhaps literally, and she has only two friends to confide in: one, a reckless alcoholic, and the other, a bizarre fussy budget. oh, and now she also needs to find lara, who has mysteriously disappeared from campus. from the author of *the postmortal* and *the hike* comes his most deliriously entertaining novel yet. *point b* is the story of one clever and occasionally determined young woman seeking both love and vengeance, but hardly ready for those two missions to intersect. it takes you to vietnam, hollywood, singapore, tokyo, inland mexico, oxford, the maldives, cuba, the coast of northeast australia, and all points beyond. you will find yourself plunged into a borderless, chaotic, oddly miraculous world that is ruled by a single bloodless corporation and by a family determined to keep it that way. but portsys never expected anna huff, and anna huff never expected love to make her this daring immunization to protect infants and children.

from vaccine preventable diseases is one of the greatest achievements of public health immunization is not without risks however it is well established for example that the oral polio vaccine can on rare occasion cause paralytic polio the immunization safety review committee was established by the institute of medicine iom to evaluate the available evidence on a series of immunization safety concerns the committee is charged with examining three immunization safety hypotheses each year during the three year study period 2001 2003 while all of the committee members share the view that immunization is generally beneficial none of them has a vested interest in the specific immunization safety issues that come before the group in this report which is the fourth in the series the committee examines the hypothesis that the hepatitis b vaccine increases the risk for demyelinating disorders of the central or peripheral nervous systems including multiple sclerosis ms and guillain barré syndrome gbs
