Streets with a Story 2005-08 this book closes the gap for beginners who want to study the amharic language and had difficulties in finding the right grammar for this purpose the first grammar of amharic the national language of ethiopia was published by hiob ludolf in 1698 the amharic grammar published by praetorius in 1879 is based on amharic religious texts and on scattered material usually composed by missionaries a milestone in the study of amharic is marcel cohen s *traite de langue amharique* 1936 but this grammar too is not completely suited for beginners since the author s generalizations are at times aimed at linguists the grammar that comes closest to the concept of a beginner s grammar is that of c h dawkin 1960 yet this grammar is extremely short does not give examples and does not introduce the student to the intricacies of the language the new

book gives all the grammatical forms and the sentences of the present grammar in amharic script and in phonetic transcription the illustrative examples have a free and a literal translation this procedure should likewise prove to be useful for the semitist as well as for the general linguist

LatCrit 1981 katya mandoki advances in this book the thesis that it is not only possible but crucial to open up the field of aesthetics traditionally confined to the study of art and beauty toward the richness and complexity of everyday life she argues that in every process of communication whether face to face or through the media fashion and political propoganda there is always an excess beyond the informative and functional value of a message this excess is the aesthetic following huizinga s view of play as an ingredient of any social environment mandoki explores how various cultural practices are in fact forms of playing since for the author aesthetics and play are siamese twins one of the unique contributions of this book is the elaboration and application of a semiotic model for the simultaneous analysis of social interactions in the four registers namely visual auditory verbal and body language to detect the aesthetic strategies deployed in specific situations she argues that since the presentation of the self is targeted towards participants sensibilities aesthetics plays a key role in these modes of exchange consequently the author updates important debates in this field to clear the way for a socio aesthetic inquiry through contexts such as the family school medical artistic or religious traditions from which social identities emerge
