cell phones and personal digital assistants pdas have become indispensable tools for today's highly mobile workforce. Small and relatively inexpensive, these devices can be used not only for voice calls, simple text messages, and personal information management (PIM) but also for many functions done at a desktop computer. While these devices provide productivity benefits, they also pose new risks. This document is intended to assist organizations in securing cell phones and PDAs. More specifically, this document describes in detail the threats faced by organizations that employ handheld devices and the measures that can be taken to counter those threats. Accompanying CD-ROM contains an audio-visual tutorial with demonstrations. Page 4 of cover. Forensic specialists periodically

encounter unusual devices and new technologies normally not envisaged as having immediate relevance from a digital forensics perspective. The objective of the guide is twofold: to help organizations evolve appropriate policies and procedures for dealing with personal digital assistants (PDAs) and to prepare forensic specialists to deal with new situations when they are encountered. This guide provides an in-depth look into PDAs and explains associated technologies and their impact on the procedures for forensic specialists. It covers the characteristics of three families of devices: Pocket PC, Palm OS, and Linux-based PDAs, and the relevance of various operating systems associated with them. Preliminary damage assessment (PDA) Pocket Guide serves as a quick reference tool for FEMA, state, local, tribal, and territorial (SLTT) government partners conducting PDAs to determine the magnitude of damage and impact of disasters.
