Pregnancy-Related Anxiety 2021-10-26 black middle class women and pregnancy loss a qualitative inquiry is the first qualitative research case study of its kind focused on black american born middle class professional married women who have all lived through infant loss this study examines the infant mortality disparity blacks 12 40 whites 5 35 outside the poverty paradigm with probable implications for minority groups in england and wales having a similar racial history to the u s with caribbean and pakistani im rates being more than twice that of white british babies

Obesity and Pregnancy 2013-08-11 reproducing race an ethnography of pregnancy and birth at a large new york city public hospital explores the role of race in the medical setting khiara m bridges investigates how race commonly seen as biological in the medical world is socially constructed among women dependent on the public healthcare system for prenatal

care and childbirth bridges argues that race carries powerful material consequences for these women even when it is not explicitly named showing how they are marginalized by the practices and assumptions of the clinic staff deftly weaving ethnographic evidence into broader discussions of medicaid and racial disparities in infant and maternal mortality bridges shines new light on the politics of healthcare for the poor demonstrating how the medicalization of social problems reproduces racial stereotypes and governs the bodies of poor women of color

Health Insurance is a Family Matter 2002-09-18 epigenetics is the study of heritable changes in gene expression and has been heralded as one of the most promising new fields of scientific inquiry current large scale pregnancy studies draw on epigenetics to connect pregnant women s behavioral choices like diet and exercise to future health risks for unborn babies as the first ethnography of its kind weighing the future examines the sociopolitical implications of ongoing pregnancy trials in the united states and the united kingdom illuminating how processes of scientific knowledge production are linked to capitalism surveillance and environmental reproduction the environments we imagine to shape our genes bodies and future health are tied to race gender and structures of inequality this groundbreaking book makes the case that science and how we translate it is a reproductive project that requires feminist vigilance instead of fixating on a future at risk this book brings attention to the present at stake

Clinical Research Involving Pregnant Women 2018-07-07 fertility and pregnancy an epidemiologic perspective is a lively overview of human reproduction how it works and what causes it to go wrong weaving together history biology obstetrics pediatrics demography infectious diseases molecular genetics and evolutionary biology allen wilcox brings a fresh coherence to the epidemiologic study of reproduction and pregnancy along the way he provides entertaining anecdotes superb graphs odd tidbits and occasional humor that bring the topic to life the book is divided into two sections the first lays the foundations the basic principles of reproductive physiology demography infectious diseases and genetics as they apply to human reproduction the second part deals with the endpoints of reproductive epidemiology a spectrum ranging from infertility and fetal loss to birth defects and the delayed effects of fetal exposures the book closes with a discussion of unsolved problems suggesting possible research projects for a new generation of epidemiologists an extensive glossary makes this a valuable reference as well as an enjoyable read

Pharmacoepidemiology 2019-10-23 the placenta is fascinating and complex basically foreign to the maternal body it can be thought of as an organ transplanted onto the mother's host tissue as such it embodies all the principles of tissue acceptance and rejection many of the risks of pregnancy and labor have now been eliminated and the placenta is likely to be at the root of many of the dangers to the unborn child that remain a breakdown of the relationship between the placenta and the maternal tissue may turn out to be the cause of the

majority of early lost pregnancies

The Health Effects of Cannabis and Cannabinoids 2017-03-31 risk age and pregnancy provides an in depth case study of the operation of a prenatal genetic screening and testing system the methodology integrates observational qualitative interview and survey data the perspectives of pregnant women hospital doctors and midwives are explored in depth as is the communication between women and the hospital doctors who advise them the book offers insights which are relevant to those concerned with the rapidly growing field of genetic risk management

HIV and Pregnancy 1996

Women, Drinking, and Pregnancy 1985 it sounds simple women who drink while pregnant may give birth to children with defects so women should not drink during pregnancy yet in the 20 years since it was first described in the medical literature fetal alcohol syndrome fas has proved to be a stubborn problem with consequences as serious as those of the more widely publicized crack babies this volume discusses fas and other possibly alcohol related effects from two broad perspectives diagnosis and surveillance and prevention and treatment in addition it includes several real life vignettes of fas children the committee examines fundamental concepts for setting diagnostic criteria in general reviews and updates the diagnostic criteria for fas and related conditions and explores current research findings and problems associated with fas epidemiology and surveillance in addition the

book describes an integrated multidisciplinary approach to research on the prevention and treatment of fas the committee discusses levels of preventive intervention reviews available data about women and alcohol abuse and treatment among pregnant women explores the psychological and behavioral consequences of fas at different ages examines the current state of knowledge about medical and therapeutic interventions education efforts and family support programs this volume will be of special interest to physicians nurses mental health practitioners school and public health officials policymakers researchers educators and anyone else involved in serving families and children especially in high risk populations

Drug Use in Pregnancy 1988 significant changes have taken place in the policy landscape surrounding cannabis legalization production and use during the past 20 years 25 states and the district of columbia have legalized cannabis and or cannabidiol a component of cannabis for medical conditions or retail sales at the state level and 4 states have legalized both the medical and recreational use of cannabis these landmark changes in policy have impacted cannabis use patterns and perceived levels of risk however despite this changing landscape evidence regarding the short and long term health effects of cannabis use remains elusive while a myriad of studies have examined cannabis use in all its various forms often these research conclusions are not appropriately synthesized translated for or communicated to policy makers health care providers state health officials or other stakeholders who have been charged with influencing and enacting policies procedures and laws related to cannabis

unlike other controlled substances such as alcohol or tobacco no accepted standards for safe use or appropriate dose are available to help guide individuals as they make choices regarding the issues of if when where and how to use cannabis safely and in regard to therapeutic uses effectively shifting public sentiment conflicting and impeded scientific research and legislative battles have fueled the debate about what if any harms or benefits can be attributed to the use of cannabis or its derivatives and this lack of aggregated knowledge has broad public health implications the health effects of cannabis and cannabinoids provides a comprehensive review of scientific evidence related to the health effects and potential therapeutic benefits of cannabis this report provides a research agenda outlining gaps in current knowledge and opportunities for providing additional insight into these issues that summarizes and prioritizes pressing research needs

WHO Recommendations on Antenatal Care for a Positive Pregnancy Experience 2016
immunization during pregnancy with currently recommended vaccines prevents infection in the mother the unborn fetus and the young infant and there is an increasing focus from different stakeholders to use this approach for other infections of importance to protect these vulnerable groups the aim of this maternal immunization book is to provide a contemporary overview of vaccines used in pregnancy and the lactation period with emphasis on aspects of importance for the target groups namely rationale for the use of vaccines in pregnancy safety immunogenicity immunology timing to vaccinate repeat doses

protective effects in the mother fetus and infant and public acceptance and implementation of existing and of future vaccines provides an overview of a quickly evolving topic this will benefit the reader who wishes to rapidly become informed and up to date with new developments in this field suitable to a broad audience scientific researchers obstetricians gynecologists neonatologists vaccinators pediatricians students and industry maternal vaccination impacts a wide range of specialists allows health care professionals researchers to gain insight into other aspects of vaccination in pregnancy outside of their specialism is coauthored by specialists from multiple disciplines providing a diverse view of the subject increasing its interest and appeal creates awareness of the current developments in this area of medicine and of the potential of maternal vaccination to improve the health of mothers and infants worldwide

The Role of Pregnancy Nutrition in Maternal and Offspring Health 2019-12-03 the rights of pregnant workers as well as the lack of paid maternity leave have increasingly become topics of a major policy debate in the united states yet few discussions have focused on the u s military where many of the latest policy changes focus on these very issues despite the armed forces increases to maternity related benefits servicewomen continue to be stigmatized for being pregnant and taking advantage of maternity policies in an effort to understand this disconnect megan mcfarlane analyzes military documents and conducts interviews with enlisted servicewomen and female officers she finds a policy culture

disparity within the military that pregnant servicewomen themselves often co construct making the policy changes significantly less effective mcfarlane ends by offering suggestions for how these policy changes can have more impact and how they could potentially serve as an example for the broader societal debate

1st Congress of the International Association of the Diabetes and Pregnancy Study Groups 2003 abstract this book designed for the general public presents the relationship between alcohol consumption during pregnancy and fetal harm it looks at a variety of factors involved in the risk for development of fetal alcohol syndrome such as mother's age race nationality occupation general health and nutritional status women's changing roles throughout the world have coincided with increased use of alcohol among women statistically more women are drinking alcoholic beverages than in the past and admission to hospitals for alcohol dependence has risen steadily in the united kingdom where this book was published

Weighing the Future 2021-12-14 in pregnancy maternal nutrition sustains and nourishes the developing child imbalances in either the direction of nutritional excess or deficiency can have adverse consequences for child health in addition more research now suggests that good pregnancy nutrition influences child health beyond pregnancy and delivery this includes modifying the risk of child health outcomes as they enter childhood and adulthood through influences on placental development hormonal pathways and organ structure and

function poor pregnancy nutrition may also compromise maternal health during pregnancy which may have long term consequences for women s health understanding the biological and social mechanisms operating during pregnancy can help in the design of better clinical and public health interventions this special issue on the role of pregnancy nutrition in maternal and offspring health includes etiological and mechanistic studies of pregnancy nutrition with short and long term maternal and child health outcomes including original research narrative reviews and systematic reviews and meta analyses together this body of work provides important insights into the influence of dietary patterns food groups and nutrients on pregnancy outcomes and long term neurodevelopmental respiratory and metabolic health in the children it also highlights nutritional consequences for specific groups of women including those with pregnancy complications and eating disorders

Registries for Evaluating Patient Outcomes 2014-04-01 this user s guide is intended to support the design implementation analysis interpretation and quality evaluation of

registries created to increase understanding of patient outcomes for the purposes of this guide a patient registry is an organized system that uses observational study methods to collect uniform data clinical and other to evaluate specified outcomes for a population defined by a particular disease condition or exposure and that serves one or more predetermined scientific clinical or policy purposes a registry database is a file or files derived from the registry although registries can serve many purposes this guide focuses on registries created for one or more of the following purposes to describe the natural history of disease to determine clinical effectiveness or cost effectiveness of health care products and services to measure or monitor safety and harm and or to measure quality of care registries are classified according to how their populations are defined for example product registries include patients who have been exposed to biopharmaceutical products or medical devices health services registries consist of patients who have had a common procedure clinical encounter or hospitalization disease or condition registries are defined by patients having the same diagnosis such as cystic fibrosis or heart failure the user s guide was created by researchers affiliated with ahrq s effective health care program particularly those who participated in ahrq s decide developing evidence to inform decisions about effectiveness program chapters were subject to multiple internal and external independent reviews

Fetal Alcohol Syndrome 1996-04-01

Cancer and Pregnancy 2007-11-09

Maternal Recall of Birth and Pregnancy Outcomes 1997 diabetes mellitus one of the most prevalent complications during pregnancy can cause a range of problems for women and their developing babies the number of types of diabetes during pregnancy has dramatically increased worldwide in recent years obesity is a very common risk factor for the development of gdm and type 2 diabetes to prevent birth defects and other health problems optimal healthcare before and during pregnancy is mandatory to reach this goal a multidisciplinary approach is of major importance this book presents the latest knowledge on the physiopathology diagnosis autoimmunity genetics omics and management and treatment of diabetic pregnancy renowned healthcare professionals and academic experts provide insights into the complexity of diabetic pregnancy its treatment and pregnancy complications this is a comprehensive overview of the clinical characteristics of pregnancy related type 1 and 2 diabetes as well as of gestational diabetes it is a must read for everyone involved in the monitoring of diabetes during pregnancy

The Human Placenta 1993-01-18

Black Middle-Class Women and Pregnancy Loss 2013-08-15 based on a non consequentialist ethical theory this book critically examines the prevalent view that if a fetus has the moral standing of a person it has a right to life and abortion is impermissible most discussion of abortion has assumed that this view is correct and so has focused on the

question of the personhood of the fetus kamm begins by considering in detail the permissibility of killing in non abortion cases which are similar to abortion cases she goes on to consider the case for the permissibility of abortion in many types of pregnancies including ones resulting from rape voluntary pregnancy and pregnancy resulting from a voluntary sex act even if the fetus is considered a person this argument emerges as part of a broader theory of creating new people responsibly kamm explores the implications of this argument for informed consent to abortion responsibilities in pregnancy that is not aborted and the significance of extra uterine gestation devices for the permissibility of abortion

Prenatal Care 1988-02-01 health insurance is a family matter is the third of a series of six reports on the problems of uninsurance in the united states and addresses the impact on the family of not having health insurance the book demonstrates that having one or more uninsured members in a family can have adverse consequences for everyone in the household and that the financial physical and emotional well being of all members of a family may be adversely affected if any family member lacks coverage it concludes with the finding that uninsured children have worse access to and use fewer health care services than children with insurance including important preventive services that can have beneficial long term effects

Creation and Abortion 1992-07-02

Work During Pregnancy 1991

Special Issue on the Fifth World Congress of the International Society for the Study of Hypertension in Pregnancy 1987

this book provides a collective examination of the theoretical empirical and clinical perspectives of pregnancy related anxiety pregnancy related anxiety is a distinct form of anxiety that is experienced by pregnant women and is characterized by pregnancy specific fears and worries this form of anxiety has been associated with a range of negative obstetric neonatal and maternal outcomes there has been increased research interest in this form of anxiety particularly over the last 15 years the content is organized in three sections the first section provides a thorough understanding of pregnancy related anxiety ranging from its historical development evidence of its distinctiveness to the antecedents and outcomes of this anxiety for the mother and child the second section examines key clinical issues around diagnosis and treatment specifically current diagnosis screening for this anxiety and approaches for intervention and treatment the final section considers emerging areas of research such as pertinent issues around culture and acculturation which are key issues in an increasingly multicultural world moreover the effects of pregnancy related anxiety on the woman s broader psychosocial functioning are considered with specific chapters on body image and sexual abuse two key areas of concern a seminal resource this book provides a broad examination of the topic from multiple frameworks and perspectives which sets this book apart from other books in print this book intends to inform and stimulate future research studies as well as increase

awareness and understanding of pregnancy related anxiety it is a must read for researchers educators clinicians and higher education students who care about delivering better support and services to pregnant women particularly those who are vulnerable and distressed

Reproducing Race 2011-03-18

Maternal Immunization 2019-11-26

Methadone and Pregnancy 1974

Clinical Pharmacology During Pregnancy 2012-12-05 this book discusses how to respectfully and responsibly include pregnant women in clinical research in sharp contrast the existing literature predominantly focuses on the reasons why the inclusion of pregnant

women in clinical research is necessary viz to develop effective treatments for women during pregnancy to promote fetal safety to reduce harm to women and fetuses from suboptimal care and to allow access to the benefits of research participation this book supports the shift to a new default position whereby pregnant women are included in clinical research unless researchers argue convincingly for their exclusion this shift raises many as yet unexplored ethical and policy questions about existing barriers to the equitable inclusion of pregnant women in research this book is original in three key ways first it presents an unparalleled depth of analysis of the ethics of research with pregnant women bringing together many of the key authors in this field as well as experts in research ethics and in vulnerability who have not previously applied their work to pregnant women second it includes innovative theoretical work in ethics and disease specific case studies that highlight the current complexity and future challenges of research involving pregnant women third the book brings together authors who argue both for and against including more pregnant women in formal clinical trials

Birth Settings in America 2020-05-01 abstract this book addresses the use of drug groups for various clinical indications during pregnancy in general non pharmacologic remedies are recommended if these will suffice before drug therapy is instituted known adverse effects of drugs are documented and caution is advised because of the many unknowns about long term effects of drug exposure to the developing fetus drugs used for the common cold

antituberculosis agents antihypertensives anticonvulsants and marijuana and cocaine are included

Psychological Effects of Motherhood 1980 a study of self reported and biochemically tested marijuana use among pregnant women in california found that marijuana use during pregnancy was more common among younger women with rates as high as 22 percent of pregnant adolescents and 19 percent of pregnant young adults ages 19 24 screening positive for marijuana use 3 to assist clinicians and others in raising awareness of the known and potential harms of marijuana use during pregnancy this guide focuses on the growing body of evidence related to maternal marijuana use the evidence from population based data on potential harms to newborns is mixed some studies rely on selfreported data which can underestimate the proportion of women who are using marijuana and skew study findings other factors such as concurrent substance use stress socioeconomic status and others can influence the baby s health

Recent Advances in Pathophysiological Conditions in Pregnancy 1984 prenatal care programs have proven effective in improving birth outcomes and preventing low birthweight yet over one fourth of all pregnant women in the united states do not begin prenatal care in the first 3 months of pregnancy and for some groupsâ such as black teenagersâ participation in prenatal care is declining to find out why the authors studied 30 prenatal care programs and analyzed surveys of mothers who did not seek prenatal care this

new book reports their findings and offers specific recommendations for improving the nation's maternity system and increasing the use of prenatal care programs

Fertility and Pregnancy 2010-02-26 emily oster is the non judgmental girlfriend holding our hand and guiding us through pregnancy and motherhood she has done the work to get us the hard facts in a soft understandable way amy schumer fully revised and updated for 2021 what to expect when you're expecting meets freakonomics an award winning economist disproves standard recommendations about pregnancy to empower women while they're expecting from the author of cribsheet and the family firm a data driven decision making guide to the early years of parenting pregnancy unquestionably one of the most profound meaningful experiences of adulthood can reduce otherwise intelligent women to well babies pregnant women are told to avoid cold cuts sushi alcohol and coffee without ever being told why these are forbidden rules for prenatal testing are similarly unexplained moms to be desperately want a resource that empowers them to make their own right choices when award winning economist emily oster was a mom to be herself she evaluated the data behind the accepted rules of pregnancy and discovered that most are often misguided and some are just flat out wrong debunking myths and explaining everything from the real effects of caffeine to the surprising dangers of gardening expecting better is the book for every pregnant woman who wants to enjoy a healthy and relaxed pregnancy and the occasional glass of wine

The Turnaway Study 2021-06 now with a new afterword by the author back cover
Pregnancy & Exercise 1992 as women of childbearing age have become heavier the trade off between maternal and child health created by variation in gestational weight gain has become more difficult to reconcile weight gain during pregnancy responds to the need for a reexamination of the 1990 institute of medicine guidelines for weight gain during pregnancy it builds on the conceptual framework that underscored the 1990 weight gain guidelines and addresses the need to update them through a comprehensive review of the literature and independent analyses of existing databases the book explores relationships between weight gain during pregnancy and a variety of factors e g the mother s weight and height before pregnancy and places this in the context of the health of the infant and the mother presenting specific updated target ranges for weight gain during pregnancy and guidelines for proper measurement new features of this book include a specific range of recommended gain for obese women weight gain during pregnancy is intended to assist practitioners who care for women of childbearing age policy makers educators researchers and the pregnant women themselves to understand the role of gestational weight gain and to provide them with the tools needed to promote optimal pregnancy outcomes

Militarized Maternity 2021-04-08

Risk, Age and Pregnancy 2001-03-13 clinical pharmacology during pregnancy is written for clinicians physicians midwives nurses pharmacists and other medical professionals
