NTA UGC NET/JRF/SET Paper II Geography 28 Solved Papers (2012-2021) 2014-12-02 recent studies show that the number of students who select to study geography in malaysian secondary schools and their level of achievement in the subject has decreased the main factor is lack of motivation over multiple decades a large and growing body of literature has indicated that ict enhances students motivation to learn and their learning outcome the studies demonstrate that the use of ict in teaching activities provides more fun in an authentic learning environment and increases learning autonomy interaction and collaboration it is therefore a rich opportunity for motivating students to study in addition despite an increased interest among scholars to investigate the impact of ict integrated geography teaching on students motivation and achievement none have investigated the effects of gis as a new technological teaching tool on students geography learning goals and their learning outcomes the idea for this book originated from the author s phd study to examine the effects of gis based instruction on secondary school student geography learning goals and their

learning outcomes this book is highly beneficial for geography teachers to use multiple teaching methods and pedagogies in a gis integrated teaching environment to cultivate underachieving students mastery goal performance approach goal and learning and to decrease avoidance behaviour in learning the subject although gis is widely used in malaysia it has not been embraced by the malaysian education system and is absent from the geography curriculums in the primary and secondary school contexts hence writing of this book will also help the curriculum development centre and ministry of education malaysia develop a gis based teaching module to enhance the learning motivation of geography and improve the student level of achievement

Evolutionary Economic Geography 2016-10-19 state capitals are an indelible part of the american psyche spatial representations of state power and national identity learning them by heart is a rite of passage in grade school a pedagogical exercise that emphasizes the importance of committing place names to memory but geographers have yet to analyze state capitals in any depth in american capitals christian montès takes us on a well researched journey across america from augusta to sacramento albany to baton rouge shedding light along the way on the historical circumstances that led to their appointment their success or failure and their evolution over time while all state capitals have a number of characteristics in common as symbols of the state as embodiments of political power and decision making as

public spaces with private interests montès does not interpret them through a single lens in large part because of the differences in their spatial and historical evolutionary patterns some have remained small while others have evolved into bustling metropolises and montès explores the dynamics of change and growth all but eleven state capitals were established in the nineteenth century thirty five before 1861 but rather astonishingly only eight of the fifty states have maintained their original capitals despite their revered status as the most monumental and historical cities in america capitals come from surprisingly humble beginnings often plagued by instability conflict hostility and corruption montès reminds us of the period in which they came about an era of pioneer and idealized territorial vision coupled with a still evolving american citizenry and democracy
