direct drive brushless dc torque motors moog inc Mar 21 2023 moog 39 s direct drive brushless frameless motors are designed to operate over a range of speeds for a wide variety of military aerospace and industrial applications different applications require unique configurations of mounting flanges housings output shafts and electrical requirements

what are torque motors and why do they work so well Jun 24 2023 torque motors are a type of direct drive brushless permanent magnet synchronous motors that are being used increasingly in high precision applications benefits of torque motors include minimal mechanical wear reduced maintenance and system cost and improved dynamic performance

dc torque motors high torque direct drive motors kollmorgen Aug 26 2023 high torque to power ratio for low power input requirements low electrical time constant for excellent command response at all operating speeds linear torque response for all input currents and speeds with no dead spots reliable operation over a long life

high torque motors baumüller baumueller nuermont corp May 23 2023 a high torque motor is a multi pole electric direct drive with very high torque compared to a motor transmission combination a high torque motor can increase productivity of the machine while simultaneously reducing operating energy costs how to integrate a direct drive into your machine installation options for torque motors

dst2 high torque motors low maintenance energy efficient Jul 25 2023 wide selection of high torque motors with high torque motors in the dst2 series baumüller offers a powerful gearless drive technology for low maintenance and energy efficient solutions the high torque servo motors are currently available in six sizes between 135 and 560 and depending on size can reach speeds up to 2000 min⁻¹ and an output

high torque motors simotics ht serie ht direct siemens Apr 22 2023 the high torque motors are permanent magnet synchronous motors that can provide high torques at low speeds directly at the driven machine high efficiencies and good power factors can also be achieved at low speeds as a result of the permanent magnet rotors the motors are offered as a harmonized system together with sinamics drive converters
