u s navy personnel who work on submarines are in an enclosed and isolated environment for days or weeks at a time when at sea to protect workers from potential adverse health effects due to those conditions the u s navy has established exposure guidance levels for a number of contaminants in this latest report in a series the navy asked the national research council nrc to review and develop when necessary exposure guidance levels for 11 contaminants the report recommends exposure levels for hydrogen that are lower than current navy guidelines for all other contaminants except for two for which there are

insufficient data recommended levels are similar to or slightly higher than those proposed by the navy the report finds that overall there is very little exposure data available on the submarine environment and echoes recommendations from earlier nrc reports to expand exposure monitoring in submarines all eight of the natef job sheets manuals have been thoughtfully designed to assist users gain valuable job preparedness skills and master specific diagnostic and repair procedures required for success as a professional automotive technician ideal for use either as a stand alone item or with any comprehensive or topic specific automotive text the entire series is aligned with the 2013 natef tasks and consists of individual books for each of the following areas engine repair automatic transmissions transaxles manual drive trains and axles suspension and steering brakes electricity electronics heating and air conditioning and engine performance central to each manual are well designed and easy to read job sheets each of which contains specific performance based objectives lists of required tools and materials safety precautions plus step by step procedures to lead users to completion of shop activities also each job sheet references all applicable natef standards as they work through each task users are encouraged to conduct tests record measurements make observations and employ critical thinking skills in order to draw conclusions space is included for users to make notes concerning problems encountered while working and for instructors to add comments and or grades important notice media content referenced within the product description or the product text may not be available in the ebook version the light vehicle tasksheet manual for natef proficiency 2013 natef edition is designed to guide students through the tasks necessary to meet national automotive technicians education foundation natef requirements for automotive service excellence ase certification based on the new 2012 natef automobile accreditation task lists the second edition identifies the level of training maintenance light repair mlr auto service technology ast and master auto service technology mast required to complete each task this manual will assist students in demonstrating hands on performance and proficiency in fundamentals diagnosis service and repair of cars and light trucks it can also serve as a personal portfolio of documented experience for prospective employment light vehicle tasksheet manual for natef proficiency 2013 natef edition includes list of required and recommended materials and equipment for each task critical safety issues relevant to the task student notes boxes offering vital information the student needs to consider while performing the task time card feature to allow students to track the time they spend on each task performance rating and instructor sign off for each task a correlation guide cross referencing the tasks with their natef task numbers summarizes core information for quick reference in the workplace using tables and checklists wherever possible essential reading for safety officers company managers engineers transport personnel waste disposal personnel environmental health officers trainees on industrial training courses and engineering students this book provides concise and clear explanation and look up data on properties exposure limits flashpoints monitoring techniques personal protection and a host of other parameters and requirements relating to compliance with designated safe practice control of hazards to people s health and limitation of impact on the
