every art and every inquiry and
similarly every action and
pursuit is thought to aim at
some good and for this reason
the good has rightly been
declared to be that at which all
things aim but a certain
difference is found among ends
some are activities others are
products apart from the
activities that produce them
where there are ends apart
from the actions it is the nature
of the products to be better
than the activities now as there
are many actions arts and
sciences their ends also are
many the end of the medical
art is health that of
shipbuilding a vessel that of
strategy victory that of

economics wealth but where
such arts fall under a single
capacity as bridle making and
the other arts concerned with
the equipment of horses fall
under the art of riding and this
and every military action under
strategy in the same way other
arts fall under yet others in all
of these the ends of the master
arts are to be preferred to all
the subordinate ends for it is
for the sake of the former that
the latter are pursued it makes
no difference whether the
activities themselves are the
ends of the actions or
something else apart from the
activities as in the case of the
sciences just mentioned p 15
