and joys waiting to be

discovered when we engage in
activities on our own as she
soothes the disquietude that
accompanies the fear of
aloneness and celebrates the
power of solitude to change
how we see ourselves and the
world tanya reveals how
removed from the noise and
distractions of other lives we
can find acceptance and grace
within for those who have
never been by themselves or
those who embrace being on
their own how to be alone
encourages us to recognize and
embrace the possibilities of
being alone and reminds us of

easter island or rapa nui as it is known to its inhabitants is located in the pacific ocean 3600 kilometres west of south america annexed by chile in 1888 the island has been a source of fascination for the world beyond the island since the first visit by europeans in 1722 due to its intriguing statues and complex history inventing easter island examines narrative strategies and visual conventions in the discursive construction of easter island as distinct from the native conception of rapa nui it looks at the geographic imaginary that pervaded the

eighteenth century a period of overwhelming imperial expansion beverly haun begins with a discussion of forces that shaped the european version of island culture and goes on to consider the representation of that culture in the form of explorer texts and illustrations as well as more recent texts and images in comic books and kitsch from off the island throughout easter island is used as a case study of the impact of imperialism on the view of a culture from outside the study hinges on three key points an inquiry into the formation of easter island as a subject an examination of how the constructed space and

culture have been shaped reshaped and represented in discursive spaces and a discussion of cultural memory and how the constraints of foreign texts and images have shaped thought and action about easter island richly illustrated and unique in its findings inventing easter island will appeal to cultural theorists anthropologists educators and anyone interested in the history of the south pacific

[Bowker's Complete Video Directory 2000](#) a scientific look at creationism from a former creationist a significant number of americans especially evangelical christians believe earth and humankind were

created in their present form sometime in the last 10 000 years or so the rationale being that this is presumably the story told in the book of genesis within that group any threatening scientific evidence that suggests otherwise is rejected or when possible retrofitted into a creationist worldview but can this uncomfortable blend of biblical literalism and pseudoscience hold up under scrutiny is it tenable to believe that the grand canyon was formed not millions of years ago by gradual erosion but merely thousands of years ago by the great flood were there really baby dinosaurs with noah on his ark janet kellogg ray a

science educator who grew up a creationist doesn't want other Christians to have to do the exhausting mental gymnastics she did earlier in her life working through the findings of a range of fields including geology, paleontology, and biology. She shows how a literal interpretation of the book of Genesis simply doesn't mesh with what we know to be reality, but as someone who remains a committed Christian, Ray also shows how an acceptance of the theory of evolution is not necessarily an acceptance of atheism and how God can still be responsible for having created the world even if it wasn't in a single momentary miraculous event.
