This paper presents an overview of Solomon Islands' economy. Although Solomon Islands is a small island state, low income country that is severely affected by external shocks including commodity price declines, natural disasters and climate change, it has achieved considerable gains in terms of macroeconomic stability under the extended credit facility program. Despite the low access, the program has been effective in catalyzing donor support. Economic growth in 2015 is estimated at 31.4 percent. Near term prospects remain favorable, but new sources of growth are needed over the medium term. Key policy recommendations have been discussed in the paper to further strengthen the economy of Solomon Islands.

More than a billion people watched the 9/11 World Trade Center destruction unfold on television, making it the greatest shared event in world history. Reflecting this fact, the 2003 World Trade Center Memorial Design Competition was open to anyone, drawing 5,201 entries from 60 countries, all of which were posted online. Most designs were the greyscale hardscape of typical memorials, a few were radically imaginative, some engaged memory with sound, color, movement, technology or visitor participation, others reached across the globe, cyberspace, even outer space. These imaginings stirred questions about their creators: who were they, what were they thinking and feeling, how did the concept develop? This book, based on a first ever review of the entries, tells the personal stories of more than 180

designers whose creative perspective translated an horrific event giving deeper thought to the relation of memorial spaces to history geography technology and cultural diversity bob crow was the most high profile and militant union leader of his generation this biography focuses on his leadership of the rmt union examining and exposing a number of popular myths created about him by political opponents using the schema of his personal characteristics including his public persona his politics and the power of his members it explains how and why he was able to punch above his weight in industrial relations and on the political stage helping the small rmt union become as influential as many of its much larger counterparts as rmt leader crow oversaw a rise in membership and promoted a more assertive and successful bargaining approach while he failed to unite all socialists into one new party he established himself as the leading popular critic of neo liberalism new labour and the age of austerity why the life story of the dalai lama it is a story of one man taking on an empire calling for truth peace and justice for his tibetan people here in full color for the first time people can come to know the whole drama of his lifelong struggle since the age of 15 the dalai lama has defended his people against one of the last great empires the people s republic of china under its dictatorship of the proletariat china began to invade tibet in 1950 decimating and then continually oppressing its people since colonialism cannot be practiced in our era of self determined nations china always maintains that the tibetans are a type of chinese using propaganda and military power to crush tibet s unique culture and identity yet the dalai lama resists by using only the weapon of truth along with resolute nonviolence even worrying some of his own people by seeking dialogue and reconciliation based on his more realistic vision the great 14th dalai lama of tibet has become the first global dalai lama a prominent transnational leader of all who want to make the dramatic changes actually necessary for life on earth to thrive for centuries to come considered the

pioneering insight into the usefulness of role theory in foreign policy making in the developing world the perfect combination of theoretically oriented and empirically rich analysis make this volume an ideal resource for scholars and researchers of international relations foreign policy middle east politics and international security out of the ashes is the definitive history of the provisional irish republican movement from its formation at the outset of the modern troubles up to and after its official disarmament in 2005 robert white a prolific observer of ira and sinn féin activities has amassed an incomparable body of interview material from leading members over a thirty year period in this defining study the interviewees provide extraordinary insights into the complex motivations that provoked their support for armed struggle their eventual reform and the mind set of today s dissidents who refuse to lay down their arms those interviewed stem from every stage of the provisionals history from founding figures such as seán mac stiofáin ruairí Ó brádaigh and joe cahill to the new generation that replaced them martin mcguinness danny morrison and brendan hughes among others out of the ashes is a pioneering history that breaks new ground in defining how the provisionals operated caused worldwide condemnation and were transformed by constitutional politics this 2014 article iv consultation highlights that with subdued international prices inflationary pressures in mauritius declined in 2013 despite the public sector wage increases the unemployment rate was unchanged compared with 2012 at 8 percent credit to private sector growth remained robust on the external front the current account deficit widened to almost 10 percent of gdp in 2013 the reserve cover of imports of goods and services stayed constant at 41 2 months with the bank of mauritius accumulating additional net international reserves the structural primary deficit was broadly unchanged relative to 2011 the implicit topology of international institutional complexes varies greatly across policy areas in some areas the lion s share of everyday policy cooperation is

shaped by a single institution with alternative and more regional institutions operating in its shadow in other policy fields institutional structures appear to be different seeing a range of non hierarchical decentralized alternative institutions the institutional topology of international regime complexes mapping inter institutional structures in global governance provides a systematic conceptualization and explanation of the evolution of these varying institutional topologies underlying regime complexes across five issue areas of global governance intellectual property protection tax avoidance financial stability development aid and energy governance by providing an empirically grounded network based conceptualization and mapping of institutional topologies as well as a theoretical explanation for their variation across policy space and time the book offers a comprehensive analysis of both the empirical manifestation of inter institutional structures across various policy fields of global governance and the issue specific factors that shape the varying institutional trajectories spurring de centralization daßler combines quantitative network analyses with qualitative case studies to trace institutional decentralization processes across five highly relevant issue areas of global governance this volume shows how the nature of issue specific cooperation problems translates into disparate structures among multilateral institutions occupying the same regime complex in light of growing concerns about the future trajectories of global governance in times of heightened geopolitical tensions daßler offers a fresh perspective to comparatively capture the profoundly varying institutional landscapes across different issue areas and their associated challenges and benefits of multilateral cooperation transformations in governance is a major academic book series from oxford university press it is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism and environmental and urban studies concerned with the dispersion of

authority from central states to supranational institutions subnational governments and public private networks it brings together work that advances our understanding of the organization causes and consequences of multilevel and complex governance the series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars the series is edited by liesbet hooghe and gary marks of the university of north carolina chapel hill and walter mattli of the university of oxford rebel politics analyzes the changing dynamics of the civil war in myanmar one of the most entrenched armed conflicts in the world since 2011 a national peace process has gone hand in hand with escalating ethnic conflict the karen national union knu previously known for its uncompromising stance against the central government of myanmar became a leader in the peace process after it signed a ceasefire in 2012 meanwhile the kachin independence organization kio returned to the trenches in 2011 after its own seventeen year long ceasefire broke down to understand these puzzling changes brener conducted ethnographic fieldwork among the knu and kio analyzing the relations between rebel leaders their rank and file and local communities in the context of wider political and geopolitical transformations drawing on political sociology rebel politics explains how revolutionary elites capture and lose legitimacy within their own movements and how these internal contestations drive the strategies of rebellion in unforeseen ways brener presents a novel perspective that contributes to our understanding of contemporary politics in southeast asia and to the study of conflict peace and security by highlighting the hidden social dynamics and everyday practices of political violence ethnic conflict rebel governance and borderland politics this book examines why when the conflict in eastern ukraine began in 2014 fighting broke out in the donets k region whereas it did not in kharkiv city despite the city like the donets k region being geographically proximate to russia and similar in

ethnic and linguistic make up based on extensive original research the book argues that a key factor was the nature and behaviour of local elites with those in kharkiv having diffuse ties to the centre and therefore being more capable of adapting to sudden profound regime change at the centre whereas the elites in the donets k region had much more concentrated ties to the centre were dependent on one network and therefore were much less able to cope with change the book thereby demonstrates how crucial for ukraine are patronal politics patronage networks and informal centre region relations and that it was these local political circumstances rather than russia which brought about the conflict the general elections held in 2014 in india the largest democracy in the world to elect the 16th lok sabha brought in dramatic results this important volume explains not only the startling victory of the bharatiya janata party bjp but also the equally surprising downfall of the congress party it examines not why bjp won and the congress lost but why the scale of bjp s victory and that of congress s defeat was so very different from the results in the years 2004 and 2009 the volume presents an in depth analysis of the electoral results state wise studies the factors leading up to these outcomes and the road india has travelled since then with contributions from india s leading political scientists psephologists sociologists and political commentators this book will be of great interest to scholars and researchers of indian politics democracy and political parties as well as south asian studies the imf s principal statistical publication international financial statistics ifs online is the standard source of international statistics on all aspects of international and domestic finance for most countries ifs online reports data on balance of payments international investment position international liquidity monetary and financial statistics exchange rates interest rates prices production government accounts national accounts and population updated monthly india doing business and investing in guide volume 1 strategic practical information regulations contacts how

does the taliban wage war how has its war changed over time firstly the movement s extraordinary military operation relies on financial backing this volume analyses such funding the taliban s external sources of support include foreign governments and non state groups both of which have affected the taliban s military campaigns and internal politics secondly this is the first full length study of the taliban to acknowledge and discuss in detail the movement s polycentric character here not only the quetta shura but also the haqqani network and the taliban s other centers of power are afforded the attention they deserve the taliban at war is based on extensive field research including hundreds of interviews with taliban members at all levels of the organization community elders in taliban controlled areas and other sources it covers the taliban insurgency from its first manifestations in 2002 up to the end of 2015 the five month battle of kunduz epitomized the ongoing transition of the taliban from an insurgent group to a more conventional military force intent on fighting a protracted civil war in this latest book renowned afghanistan expert antonio giustozzi rounds off his twenty years of studying the taliban with an authoritative study detailing the evolution of its formidable military machine civilian control over the military is widely hailed as one of the major successes of india s democracy because it is so rare especially among post colonial states this control is rightfully celebrated but has this come at a cost in the absent dialogue anit mukherjee argues that the pattern of civil military relations in india has hampered its military effectiveness diving deep into understanding the organization and internal processes within the indian military he explains how indian politicians and bureaucrats have long been content with the formal and ritualistic exercise of civilian control while the military continues to operate in institutional silos yet there has been little substantive engagement between the two to support this claim mukherjee closely examines the variables most closely associated with military effectiveness weapons

procurement jointness the ability of separate military services to operate together officer education promotion policies and defense planning further mukherjee shows how india s pattern of civil military relations best characterized as an absent dialogue adversely affects each of these processes while the book focuses on india it also highlights the importance of civilian expertise and institutional design in enhancing civilian control and military effectiveness in other democracies informed by more than a hundred and fifty interviews and recently available archival material the absent dialogue sheds new light on india s military and will reshape our understanding of both the history and contemporary dynamics of civil military relations and recurring problems therein this book explores the challenges that disinformation fake news and post truth politics pose to democracy from a multidisciplinary perspective the authors analyse and interpret how the use of technology and social media as well as the emergence of new political narratives has been progressively changing the information landscape undermining some of the pillars of democracy the volume sheds light on some topical questions connected to fake news thereby contributing to a fuller understanding of its impact on democracy in the introduction the editors offer some orientating definitions of post truth politics building a theoretical framework where various different aspects of fake news can be understood the book is then divided into three parts part i helps to contextualise the phenomena investigated offering definitions and discussing key concepts as well as aspects linked to the manipulation of information systems especially considering its reverberation on democracy part ii considers the phenomena of disinformation fake news and post truth politics in the context of russia which emerges as a laboratory where the phases of creation and diffusion of fake news can be broken down and analysed consequently part ii also reflects on the ways to counteract disinformation and fake news part iii moves from case studies in western and central europe to
