Mauritius 2002 this book offers a comprehensive assessment of the mauritian economy and its financial system the author investigates the pre and post crisis financial and economic environment of mauritius thoroughly and looks to the future potential development of the economy chapters feature in depth analysis of such aspects as the banking sector the stock market monetary policy capital structure the hedging practices of mauritian firms and the housing market in mauritius among others moreover the author not only builds a credit risk model for mauritian bankers but also develops a financial stability model to provide the reader with a full account of the mauritian economy the author ends with a chapter dedicated to a 2030 vision for mauritius this book will be of interest to researchers students policy makers central bankers and economists who wish to explore an example of an upper income developing economy in depth

*General analysis and policies 1998*

Development and Sustainable Growth of Mauritius 2018-11-27 applying commonly used vector autoregression var techniques this paper investigates the transmission mechanism of monetary policy on output and prices for mauritius using data for 1999 2009 the results show that i an unexpected monetary policy tightening an increase in the bank of mauritius policy interest rate leads to a decline in prices and output but the effect on output is weaker ii an unexpected decrease in the money supply or an unexpected increase in the nominal effective exchange rate result in a decrease in prices and iii variations of the policy variables account for small a percentage of the fluctuations in output and prices taken together these results suggest

a rather weak monetary policy transmission mechanism finally we find some differences in the transmission mechanism depending on whether core or headline consumer price index is used in the estimations

**Miracle in the Indian Ocean** 2001 describes population growth and environmental changes in mauritius from the 17th century to 1991 and discusses their interaction with various aspects of development presents a model to explain the relationship between population change socioeconomic development and environmental factors and uses the model to predict alternative scenarios for mauritius to the year 2050 discusses lessons learned from the mauritius experience in relation to global population and environmental issues

Democracy and Ethnic Conflict 2017-07-20

**Mauritius: A successful Small Island**

**Developing State** 2019-11-06 this selected issues paper develops a financial conditions index fci for mauritius an instrument to gauge the operational state of the financial sector and predict real economy activity the evolution of mauritius financial services sector has been supported by a vibrant offshore corporate sector given the strong macro financial linkages it is imperative to closely monitor domestic financial developments financial developments are broader than monetary developments depicting money supply and interest rates the fci is a robust predictor of real gdp growth in mauritius the fci can also help inform macroprudential policy decisions decisions on setting the countercyclical capital buffer of basel iii could be informed by analyzing developments in the fci as historically mauritius has not experienced drastic swings in financial credit testing the constructed fcis for predicting boom bust episodes is difficult nevertheless the fci signaled lax financial conditions in 2009 and again in 2012 that likely contributed to accelerated credit growth in 2012 2013 and a subsequent acceleration in nonperforming loans during 2014 2016

*Activities of Mauritius in the Monitoring and Analysis of Sea-level* 1994 what does multiculturalism mean in mauritius this question was the starting point of an ethnographic study on an island state in the indian ocean that had always been part of a global project and always

been post colonial the introduction of citizenship education at school in this republic with its ethnically religiously and linguistically diverse population serves as an example for the analysis of how different approaches to multicultural policy making collide the negotiations on the school subject illustrate the organisation of cultural difference by the state mainly through indo mauritian and creole nationalism

*Economics and Finance in Mauritius* 2017-01-20 informed by world systems analysis this book examines the shifting patterns of accommodation and resistance to the offshore world with a particular focus on mauritius as a critical but underappreciated offshore node mediating foreign investment into india and africa drawing on a large pool of financial data and elite interviews the authors present the first detailed comparative study of the mauritius india and mauritius africa offshore relationships these relationships serve as indicative test cases of the contemporary global tax reform agenda and its promise to rein in offshore finance whereas india s economic power and multilateral track record have enabled it to actively shape this agenda and implement it in a robust manner most african countries have found themselves either unable to meet its stringent criteria or unwilling to do so out of fear that it might discourage investment its impact on offshore financial centers has likewise been limited a few of the least sophisticated ones appear to have fallen by the wayside but the rest have either remained largely unaffected or like mauritius succeeded in consolidating their operations and surviving the current round of regulatory headwinds the findings suggest that the contemporary global tax reform agenda has thus far not only failed to make good on its promise but also actually reinforced numerous existing power hierarchies the uneven offshore world is written in an accessible style and aimed at readers without specialized knowledge of tax issues

**Titmuss, Mauritius and the Social**

**Population Policy** 1982 the african continent is the last place to consider seeking case studies

for political and economic success in the midst of this gloomy picture Botswana and Mauritius have emerged as two of the most stable democracies with the most politically and economically advanced economies in the world. In conducting a careful and critical analysis of the reasons for their success, there is often the temptation of labeling the achievements of these two nations as political and economic miracles. This study seeks not to single out these two countries as unique cases but as models of growth for the rest of the African continent from which other countries in the African sub-region can learn in order to build upon the modest gains made by these two countries and subsequently fuel their own political and economic development. The examples of Botswana and Mauritius reveal that with workable political institutions and pragmatic economic policies, a country is bound to succeed irrespective of its location and geographical inclinations and predictions. Institutions political or economic ought not necessarily to be democratic but ones oriented and suited to meet African political and economic conditions. There is a realization that pragmatic political institutions and workable economic policies are essential to Africa's overall political and economic development.

Official Methods of Control and Analysis for Mauritius Sugar Factories 1970 using data from three household surveys we review whether growth in Mauritius was inclusive and discuss the incidence of public expenditures and taxes. Generally, Mauritius enjoys an even income distribution and low rates of poverty. Nevertheless, over the 2000s, despite overall progress, the benefits of growth appear to have become more skewed. Employment income is the main contributor to inequality in Mauritius. Social

protection expenditures reduce poverty and inequality but could be better targeted particularly for pensions. Income taxes are progressive though given their small relative weight they have a negligible impact on income distribution. The VAT appears relatively progressive compared to other developing countries although its impact on the overall distribution is also small. With better targeting of the sizable social spending, significant further progress in poverty alleviation could be achieved. **Inclusive Growth and the Incidence of Fiscal Policy in Mauritius** 2016

**Official Methods of Control and Analysis for Mauritius Sugar Factories. [With Tables.]**

1964. This edited volume analyzes the Mauritius economy and highlights what conditions and policies have contributed to the development of the country. The project gives a historical and economic analysis of Mauritius and provides comparative approaches looking at other developing states in Africa and Asia. This book is intended for a broad audience consisting of not only economists with quantitative expertise but also other social scientists, policymakers, and scholars interested in the intellectually fascinating exploration of Mauritius's rapid rise and sustained growth performance.

Monetary Policy Transmission in Mauritius

Using a VAR Analysis 2010-02-01. Master's thesis from the year 2015 in the subject Business Economics, Banking, Stock Exchanges, Insurance, Accounting, Grade Distinction Course, Commonwealth Executive Master of Business Administration, Language English, Abstract Data. Innovation is gradually changing the banking industry around the world. Digital banking offers banks new opportunities and challenges. This paper gives a comprehension of how demographic characteristics, social components, and consumer perception and attitudes towards digital banking influence its adoption. Digital banking has been developed in order to enable consumers to gain a greater share in the banking market in Mauritius. There is little awareness about the emergence of digital banking despite the fact that this service is presently representing an important share in the banking market. This is because digital banking is a new industry here and therefore consumer acceptance and use of digital banking is still

limited to date very little research has been conducted into factors which influence consumer adoption of digital banking in mauritius and so therefore there is a need for a study such as this a research framework in light of the diffusion of innovation theory was utilized to identify elements that would impact the adoption of digital banking this report has evaluated current literature and conclusions about this innovation banking technology it has likewise reviewed the elements including consumer demographic characteristic consumer perceptions towards digital banking and social impacts that influence consumer adoption of this mode of banking this study additionally clarifies the strategy utilized as a part of conducting a survey of 25 questions with 185 respondents to acquire primary data for this study analysis of these outcomes was made with charts and figures to determine to what extent the factors studied influence consumer adoption of digital banking the hypotheses of this research were tested with chi square tests

the economic upturn and performance of mauritius is a far cry from predictions made in the 1960s the island's remarkable economic performance since the 1980s can be attributed to a multitude of factors instrumental to the success of the economy including structural reforms outward looking export orientated strategies diversification in the manufacturing tourism and financial services sectors amongst others sound

economic governance and institutions and significant investment in human capital this book attempts to provide a detailed analysis of the various key ingredients which have helped to propel mauritius to its current status the various chapters provide important readings for both academics and policymakers with the final chapter providing key policy strategies which the government needs to implement to help mauritius graduate to the next level of development namely to that of a high income economy and in moving out of the middle income trap laying the foundations for future growth and shared prosperity in the light of both domestic challenges and global constraints *Trade Shocks and Model Dimensionality* 1995 this dissertation aimed at identifying and explaining why trade unions in mauritius have lost their influence in the contemporary workplace context after being vibrant during the buoyant period of the 1970s trade unions now face challenges that they must justly consider to enable them develop in today's society this phenomenon is global and affects both advanced and developing economies from a workplace perspective the study examined why trade unions lost their influence over employees members and society it identified that trade union influence was on the decline and if unions maintained the same structure and objectives that focused mainly on member recruitment and disputes over pay they would not survive in the current and forthcoming conditions since there is better employee education legal framework supporting employees and wider use of technology the employee relations act 2008 served as a background with new developments in favour of the employee but unions contested key provisions it made the research conducted with a systematically organised sample of some 100 respondents confirmed that unions both public and private had to focus on strategic factors and that these would determine their success the findings showed that if unions followed key strategies for their survival namely innovation in communication leadership female empowerment social partnership union rationalisation and focus on globalisation they would secure better chances to remain relevant and maintain their credibility among the stakeholders of employee relations in particular

employees employers and government a model and recommendations were developed that could lead to ensuring the success and survival of trade unions in mauritius in the years to come
