International organizations 1991-05 when studying international law there is often a risk of focusing entirely on the content of international rules i.e. regimes and ignoring why these regimes exist and to what extent the rules affect state behavior similarly international relations studies can focus so much on theories based on the distribution of power among states that it overlooks the existence and relevance of the rules of international law both approaches hold their dangers the overlooking of international relations risk assuming that states actually follow international law and discounting the specific rules of international law makes it difficult for readers to understand the impact of the rules in more than a superficial manner this book unifies international law and international relations by exploring how international law and its institutions may be relevant and influence the course of international relations in international trade protection of the environment human rights international criminal justice and the use of force as a study on the intersection of power and law this book will be of great interest and use to scholars and students of international law international relations political science international trade and conflict resolution

Interdisciplinary Perspectives on International Law and International Relations 1985 can international institutions help create more cooperative and peaceful relations between states if so how and what motivates states to create meaningful institutions in the first place though theorists and researchers have approached these questions from different schools of thought the commonality among them is that institutions are apolitical and their purpose is to assure common gains or develop shared social norms and identities institutions succeed if they rise above petty power politics and fail when they succumb to political confrontations in this book erik voeten offers a new broader understanding of international institutions current theories offer conflicting portraits of why ios form why they succeed or not and their role in current politics while international institutions can enhance the welfare of participants they are simultaneously the structural means through which actors try to get what they want often at the expense of others voeten argues that these distributive politics shape institutions and in turn institutions shape the conduct of such politics the book will largely be theoretical as its purpose is to illustrate an alternative way of understanding institutions rather than to test a specific hypothesis after developing what the distributive theory of international institutions is voeten examines how this theory bears on other understandings of international institutions on a variety of scholarly perspectives drawing on the extensive work in this area

The Student Internationals 1970 this fully updated and revised edition explores the evolution nature and function of international law in world politics

Networking the International System 2013-02-25 economists wish to compare prices real income and output across countries and regions for many purposes in the past such comparisons were made in nominal terms or by using exchange rates across countries ignoring differences in price levels and thus distorting the results great progress has been made in interspatial comparisons in the past thirty years but descriptions and discussions of the new measures have been scattered in unpublished or inaccessible papers international and interarea comparisons of income output and prices includes discussions of developments in the united nations international comparison program the largest effort in this field and in the icop program on the production side including efforts in both to extend the comparisons to the formerly planned economies other papers in this volume explore new programs on interspatial comparisons within the united states

there are also theoretical papers on how interspatial comparisons should be made and several examples of uses of such comparisons [The Institution of International Order](#) 2018-07-11 this volume delivers a history of internationalism at the league of nations and the united nations un with a focus on the period from the 1920s to the 1970s when the nation state ascended to global hegemony as a political formation combining global regional and local scales of analysis the essays presented here provide an interpretation of the two institutions and their complex interrelationship that is planetary in scale but also pioneeringly multi local our central argument is that although the league and the un shaped internationalism from the centre they were themselves moulded just as powerfully by internationalisms that welled up globally far beyond geneva and new york city the contributions are organised into three broad thematic sections the first focused on the production of norms the second on the development of expertise and the third on the global re ordering of empire by showing how the ruptures and continuities between the two international organisations have shaped the content and format of what we now refer to as global governance the collection determinedly sets the cold war and the emergence of the third world into a single analytical frame alongside the crisis of empire after world war one and the geopolitics of the great depression each of these essays reveals how the league of nations and the united nations provided a global platform for formalising and proliferating political ideas and how the two institutions generated new spectrums of negotiation and dissidence and re codified norms as an ensemble the book shows how the league of nations and the united nations constructed and progressively re fashioned the basic building blocks of international society right across the twentieth century developing the new international history s view of the league and un as dynamic complex forces the book demonstrates that both organisations should be understood to have played an active role not just in mediating a world of empires and then one of nation states but in forging the many principles and tenets by which international society is structured
