volunteering to mentor local youth hinck argues that fan based citizenship has created new civic practices wherein popular culture may play as large a role in generating social action as traditional political institutions such as the democratic party or the catholic church in an increasingly digital world individuals can easily move among many institutions and groups they can choose from more people and organizations than ever to inspire their civic actions even the fandom for children s book series harry potter can become a foundation for involvement in political life and social activism hinck explores this new kind of engagement and its implications for politics and citizenships through case studies that encompass fandoms for sports youtube channels movies and even toys she considers the ways in which fan based social engagement arises organically from fan communities seeking to change their world as a group as well as the methods creators use to leverage their fans to take social action the modern shift to networked fluid communities hinck argues opens up opportunities for public participation that occurs outside of political parties houses of worship and organizations for social action fan based citizenship performances help us understand the future possibilities of public engagement as fans and creators alike tie the ethical frameworks of fan objects to desired social goal such as volunteering for political candidates mentoring at risk youth and promoting environmentally friendly policy politics for the love of fandom examines the communication at the center of these civic actions exploring how fans nonprofits and media companies manage to connect internet based fandom with public issues

The Dissonance of Democracy 2013-08-15 although the role of shared speech in political action has received much theoretical attention too little thought has focused on the practice of

listening in political interaction according to susan bickford even in a formally democratic polity political action occurs in a context of conflict and inequality thus the shared speech of citizenship differs significantly from the conversations of friendly associates bickford suggests that democratic politics requires a particular quality of attention one not based on care or friendship analyzing specifically political listening is central to the development of democratic theory she contends and to envisioning democratic practices for contemporary society bickford s analysis draws on the work of aristotle and of hannah arendt to establish the conflictual and contentious character of politics to analyze the social forces that deflect attention from particular voices bickford mobilizes contemporary feminist theory including gloria anzaldua s work on the connection between identity and politics she develops a conception of citizen interaction characterized by adversarial communication in a context of inequality such a conception posits public identity and hence public listening as active and creative and grounded in particular social and political contexts

The Good Citizen 2019-06-13 there has been a growing chorus
of political analysts with doomsday predictions of an american
public that is uncivil disengaged and alienated and it's only
getting worse with a younger generation of americans who do
not see the value in voting the good news is that the bad news is
wrong in this third edition of the good citizen russell dalton uses
current national public opinion surveys including new evidence
from 2018 pew center survey data to show how americans are
changing their views on what good citizenship means it's not
about recreating the halcyon politics of a generation ago but
recognition that new patterns of citizenship call for new
processes and new institutions that reflect the values of the
contemporary american public trends in participation tolerance
and policy priorities reflect a younger generation that is more
engaged more tolerant and more supportive of social justice the
good citizen shows how a younger generation is creating new
norms of citizenship that are leading to a renaissance of

democratic participation an important comparative chapter in the book showcases cross national comparisons that further demonstrate the vitality of american democracy

Fighting for Rights 2011-02-23 leaders around the globe have long turned to the armed forces as a school for the nation debates over who serves continue to arouse passion today because the military s participation policies are seen as shaping politics beyond the military specifically the politics of identity and citizenship yet how and when do these policies transform patterns of citizenship military service ronald r krebs argues can play a critical role in bolstering minorities efforts to grasp full and unfettered rights minority groups have at times effectively

contrasted their people's battlefield sacrifices to the reality of inequity compelling state leaders to concede to their claims at the same time military service can shape when for what and how minorities have engaged in political activism in the quest for meaningful citizenship employing a range of rich primary materials krebs shows how the military's participation policies shaped arab citizens struggles for first class citizenship in israel from independence to the mid 1980s and african americans quest for civil rights from world war i to the korean war fighting for rights helps us make sense of contemporary debates over gays in the military and over the virtues and dangers of liberal and communitarian visions for society it suggests that rhetoric is more than just a weapon of the weak that it is essential to political exchange and that politics rests on a dual foundation of rationality and culture

(En)gendering the Political 2017-05-08 what is the relationship between being political and citizenship what might it mean to be marginalised through both the practices and knowledge of citizenship what might citizenship look like from a position of social political and cultural exclusion this book responds to these questions by treating marginalisation as a political process and position it explores how different lives experiences and forms of political action might be engendered when subjects are excluded made vulnerable and invisible from contemporary forms of citizenship it aims to contribute to the growing body of literature on the politics of resistance by investigating how complex forms of marginality are not only produced by dominant forms of citizenship but also actively challenge them modernist approaches to politics tend to see the citizen as the ideal type of political agent and citizenship as the zenith of struggles over rights representation and belonging this edited volume challenges this approach to political subjectivity by showing

how political acts work for but also against beyond citizenship claims towards different orientations and as acts of non citizen by bringing together diverse theoretical and empirical contributions and exploring the emergent politics of marginalised subjects this collection challenges how we think about citizenship and opens up space for alternative imaginaries of political action and belonging this book was originally published as a special issue of citizenship studies

Public-Spirited Citizenship 2015-05-31 any searching look at the theory and practice of citizenship in the united states today is bewildering and disconcerting despite earnest concern for participation access and leverage there is a widespread perception that nothing citizens do has much meaning or influence this book argues that for american democracy to work in the twenty first century renewed interest in teaching the nation s young citizens a sense of the public good is imperative all of the nation s founders especially adams jefferson franklin and madison addressed the question of whether and how a citizen can make a difference in the american political process this concern harkens back even farther to locke erasmus and aristotle today one obstacle to good citizenship is the social scientific turn in political science leaders in civic education in the twentieth century eschewed grand ideas and moral principles in favor of a focus on behaviorism and competitive liberal politics another problem is the growing belief that the government has no business promoting the public good through the support of religious educational or cultural efforts ralph

ketcham vividly depicts the relationship of private self interest and public spirited action as these pertain to citizenship and good government this is an enlightening book for the general reader as well as for students professional social scientists and political philosophers

Politics of Citizenship in Indonesia 1964 the core argument of this book is that citizenship is produced and practiced through movements against injustice these take the shape of struggles by people at the grass roots level and middle classes and their representing organisations and activists for cultural recognition social and economic justice and popular representation such popular struggles in indonesia have largely ended up engaging with the state through both discursive and non discursive processes while the state is a common focal point these struggles are fragmented across different sectors and subject positions developing chains of solidarity among fragments of struggles is highly important yet attempts at bridging fragmentation leave much to be desired the character and fragmentation of popular struggles reflects the diversity of injustices and subject positions

in society but is also shaped by political dynamics the struggle for citizenship and the historical development of democracy in indonesia are closely interwoven the inability to bridge fragmentation among citizenship struggles mimics pro democracy movements lack of capacity in building broader alliances likewise these movements tendency toward elitism and habit of penetrating the state also characterise current struggles for citizenship in this situation of multiple injustices collectivities and mobilisations it could be argued that democratic representation and politics is the foremost arena for integrating and transforming antagonistic relations within fragmented popular struggles however this requires a democracy that not only has sovereign control over public affairs but also contains robust channels and organisations for political representation in indonesia it is found that formal democracy is underperforming in this respect it is thus a foremost concern to transform democracy itself also as a means for transforming structures of injustice in society the development of transformative agendas organisations and strategies remains a continued need and challenge for the realisation of citizenship in contemporary indonesia

Citizenship 2019-07-09 although we live in a period of unprecedented globalization and mass migration many contemporary western liberal democracies are asserting their sovereignty over who gets to become members of their polities with renewed ferocity citizenship matters more than ever in this book elizabeth f cohen and cyril ghosh provide a concise and comprehensive introduction to the concept of citizenship and evaluate the idea s continuing relevance in the 21st century they examine multiple facets of the concept including the classic and contemporary theories that inform the practice of citizenship the historical development of citizenship as a practice and

citizenship as an instrument of administrative rationality as well as lived experience they show how access to a range of rights and privileges that accrue from citizenship in countries of the global north is creating a global citizenship based caste system this skillful critical appraisal of citizenship in the context of phenomena such as the global refugee crisis south north migration and growing demands for minority rights will be essential reading for students and scholars of citizenship migration studies and democratic theory

Between Citizens and the State 2020-06-23 this book tracks the dramatic outcomes of the federal government's growing involvement in higher education between world war i and the 1970s and the conservative backlash against that involvement from the 1980s onward using cutting edge analysis christopher loss recovers higher education's central importance to the larger social and political history of the united states in the twentieth century and chronicles its transformation into a key mediating institution between citizens and the state framed around the three major federal higher education policies of the twentieth century the 1944 gi bill the 1958 national defense education act and the 1965 higher education act the book charts the federal

government's various efforts to deploy education to ready citizens for the national bureaucratized and increasingly global world in which they lived. Loss details the myriad ways in which academic leaders and students shaped and were shaped by the state's shifting political agenda as it moved from a preoccupation with economic security during the great depression to national security during world war ii and the cold war to securing the rights of african americans women and other previously marginalized groups during the 1960s and 70s. Along the way, Loss reappraises the origins of higher education's current day diversity regime, the growth of identity group politics, and the privatization of citizenship at the close of the twentieth century at a time when people's faith in government and higher education is being sorely tested. This book sheds new light on the close relations between american higher education and politics.

The Citizenship Revolution 2009-07-13 most americans believe that the ratification of the constitution in 1788 marked the settlement of post revolutionary disputes over the meanings of rights democracy and sovereignty in the new nation in the citizenship revolution douglas bradburn undercuts this view by showing that the union not the nation was the most important product of independence in 1774 everyone in british north america was a subject of king george and parliament in 1776 a number of newly independent states composed of american citizens began cobbling together a union to fight their former fellow countrymen but who was an american what did it mean to be a citizen and not a subject and why did it matter bradburn s stunning reinterpretation requires us to rethink the traditional chronologies and stories of the american revolutionary experience he places battles over the meaning of citizenship in law and in politics at the center of the narrative he shows that the new political community ultimately discovered that it was not really a nation but a union of states and that it was the states that set the boundaries of belonging and the very character of rights for citizens and everyone else to those inclined to believe that the ratification of the constitution assured the importance of national authority and law in the lives of american people the emphasis on the significance and power of the states as the arbiter of american rights and the character of nationhood may seem strange but as bradburn argues state control of the ultimate meaning of american citizenship represented the first stable outcome of the crisis of authority allegiance and identity that

had exploded in the american revolution a political settlement delicately reached in the first years of the nineteenth century so ended the first great phase of the american citizenship revolution a continuing struggle to reconcile the promise of revolutionary equality with the pressing and sometimes competing demands of law order and the pursuit of happiness

News on the Internet 2014 online news sites play an ever pervasive role in the daily gathering and flow of political information media has always played an intermediary role in the way that citizens receive and process news but with the speed of information transmission the segmentation of news sources and the rise of citizen journalism issues of authority audience and even the definition of news have shifted and become blurred news on the internet synthesizes research on developing and current patterns of online news provision with the literature on traditional offline media to create a conceptual map for understanding the way that public affairs and news are presented and consumed on the internet tewksbury and rittenberg look at the dual role of the internet as a source of authoritative news and as a vehicle for citizens in contemporary democracies to create and share political information throughout they address the tension between the benefits of internet news provision specifically increased citizen engagement and the negative perhaps counterintuitive effects the fragmentation of knowledge

Remaking the Republic 2007 a compelling and comprehensive history of black citizenship in the nineteenth century citizenship in the nineteenth century united states was an ever moving target the constitution did not specify its exact meaning leaving lawmakers and other americans to struggle over the fundamental questions of who could be a citizen how a person attained the status and the particular privileges citizenship afforded indeed as late as 1862 u s attorney general edward bates observed that citizenship was now as little understood in its details and elements and the question as open to argument and speculative criticism as it was at the founding of the government black people suffered under this ambiguity but also seized on it in efforts to transform their nominal freedom by claiming that they were citizens in their demands for specific rights they were christopher james bonner argues at the center of creating the very meaning of american citizenship in the decades before and after bates s lament free african americans used newspapers
