struggle to establish economic justice for the workers out of this furnace is a document of ethnic heritage and of a violent and cruel period in our history but it is also a superb story the writing is strong and forthright and the novel builds constantly to its triumphantly human conclusion this is the epic story of how african americans in the six decades following slavery transformed themselves into a political people an embryonic black nation as steven hahn demonstrates rural african americans were central political actors in the great events of disunion emancipation and nation building at the same time hahn asks us to think in more expansive ways about the nature and boundaries of politics and political practice emphasizing the importance of kinship labor and networks of communication a nation under our feet explores the political relations and sensibilities that developed under slavery and shows how they set the stage for grassroots mobilization hahn introduces us to local leaders and shows how political communities were built defended and rebuilt he also identifies the quest for self governance as an essential goal of black politics across the rural south from contests for local power during reconstruction to emigrationism biracial electoral alliances social separatism and eventually migration hahn suggests that garveyism and other popular forms of black nationalism absorbed and elaborated these earlier struggles thus linking the first generation of migrants to the urban north with those who remained in the
