Introduction to Criminal Law 1852 in the united states today criminal justice can vary from state to state as various states alter the modern penal code to suit their own local preferences and concerns in eastern europe the post communist countries are

quickly adopting new criminal codes to reflect their specific national concerns as they gain autonomy from what was once a centralized soviet policy as commonalities among countries and states disintegrate how are we to view the basic concepts of criminal law as a whole eminent legal scholar george fletcher acknowledges that criminal law is becoming increasingly localized with every country and state adopting their own conception of punishable behavior determining their own definitions of offenses yet by taking a step back from the details and linguistic variations of the criminal codes fletcher is able to perceive an underlying unity among diverse systems of criminal justice challenging common assumptions he discovers a unity that emerges not on the surface of statutory rules and case law but in the underlying debates that inform them basic concepts of criminal law identifies a set of twelve distinctions that shape and guide the controversies that inevitably break out in every system of criminal justice devoting a chapter to each of these twelve concepts fletcher maps out what he considers to be the deep structure of all systems of criminal law understanding these distinctions will not only enable students to appreciate the universal fundamental ideas of criminal law but will enable them to understand the significance of local details and variations this accessible illustration of the unity of diverse systems of criminal justice will provoke and inform students and scholars of law and the philosophy of law as well as lawyers seeking a better understanding of the law they practice

Treatise on the Criminal Law of the United States 1846 what is the criminal law for one influential answer is that the criminal law vindicates pre political rights and condemns wrongdoing on this account the criminal law has an intrinsic subject matter certain types of moral wrongdoing and it provides a distinctive response to that wrongdoing namely condemnatory punishment in criminal law in the age of the administrative state vincent chiao offers an alternative public law account what the criminal law is for chiao suggests is sustaining social cooperation with public institutions consequently we only have reason to support the use of the criminal law insofar as its use is consistent with our reasons for valuing the social order established by those institutions by starting with the political morality of public institutions rather than the interpersonal morality of private relationships this account shows how the criminal law is continuous with the modern administrative and

welfare state and why it is answerable to the same political virtues chiao sketches a democratic egalitarian account of those virtues one that is loosely consequentialist egalitarian but not equalizing and centered on a form of freedom effective access to central capabilities as its currency of evaluation from this point of view the role of the criminal law is to help public institutions create a society in which each person can lead a life as a peer among peers chiao shows how a democratic egalitarian approach to criminal justice provides a fresh perspective on a range of contemporary problems from mass incarceration to overcriminalization due process and the collateral consequences of a criminal conviction

A Practical Treatise on the Criminal Law of Scotland 2022-08-22 Principles of the Criminal Law 1899 fundamentals of criminal law caught in the act offers an accessible comprehensive and contemporary survey of the field with a focus on the current state of the law and on contemporary problems that matter to students all presented in way that piques curiosity and interest this book will cover topics such as hate crime free speech human trafficking firearms possession and use self defense cybercrime and internet stalking author daniel e hall has written engaging content to help students think critically about how criminal acts are defined defended and determined built around a conversational narrative the concepts and optional case studies connect to real life there is also a clear emphasis on cases and examples that are relevant to criminal justice majors and future practitioners such as litigation against police and correctional officers terrorism the death penalty corporal punishment in prisons etc

Criminal Law and Procedure of California 2018-04-28 criminal law in focus cliff provides an updated approach to the first year criminal law casebook with coverage and pedagogy that reflects modern criminal law practice alongside the traditional justificatory theories of punishment the book considers punishment as a tool for social

control the rise of mass incarceration and racial disparities in criminal enforcement using compelling cases that clearly articulate legal doctrine this book covers core traditional offenses like homicide and rape as well as those that figure prominently in modern practice but which have historically been absent from or deemphasized in the criminal law curriculum like drug possession and property crimes the real life applications feature following each case poses a series of questions to spotlight important topics that might otherwise be overlooked such as prosecutorial discretion and plea bargaining straightforward exposition helps students navigate their way around the differences and tensions between jurisdictional approaches to defining crimes and defenses features cliff goes beyond the traditional coverage of most casebooks which focus primarily on homicide offenses rape and to a lesser extent theft crimes with expanded coverage of property offenses an entire chapter on drug offenses and coverage of contemporary issues such as child pornography offenses and the public authority defense cliff reflects a wider more inclusive perspective on criminal law today most criminal law casebooks place extended coverage of the elements of crime mens rea actus reus and causation at the front of the book before covering individual criminal offenses which requires students to grapple with these concepts in the abstract by contrast cliff provides a brief early introduction to the elements of crime which can be covered in one class it then pivots to an integrated discussion of specific criminal offenses and covers principles related to mens rea actus reus and causation in the context of those offenses chapter 10 also covers the interpretation of criminal statutes at 550 pages cliff is much shorter than most criminal law casebooks even though it includes topics e g drug crimes that aren't covered in most criminal law casebooks professors and students will benefit from coverage of offenses that are either absent from or deemphasized in most other casebooks cliff helps professors to design a course that improves both bar exam readiness and practice readiness the inclusion of issues related to mass incarceration in the first chapter modernizes the traditional purposes of punishment material cliff retains coverage of justificatory theories of punishment including the famous case of dudley and stephens these theories aim to provide a morally defensible account of punishment and they are important but they do not fully explain the reality of punishment in the united states today by covering issues related to the rise of mass incarceration alongside the traditional theories of punishment cliff allows for a fuller discussion of the theory and reality of punishment

the book's innovative approach to covering the elements of crimes has a number of benefits it is much more efficient from a teaching perspective it will afford professors time to cover other topics that they can't usually fit into the course e.g drug crimes and a more in depth treatment of property offenses professors might spend 4 or 5 or more class sessions on the elements of crime before they can begin to cover individual offenses this is not necessary most of these concepts are more effectively covered in the context of specific crimes e.g intent and mistakes of fact can both be introduced in the context of larceny willful blindness can be addressed in the context of drug crimes then after students have learned about these concepts in the context of individual offenses the concepts can be tied together in 1 or 2 class sessions using the materials in chapter 10 covering difficult mens rea and actus reus concepts in depth before covering individual crimes as most books do often leaves students confused they don't have enough context to appreciate how the difficult mens rea problems fit into criminal law doctrine for example the structure in cliff teaches students the basics first once they have that foundation they are better able to grapple with the more complex mens rea questions in chapter 10 the traditional approach can be frustrating for faculty as well it is a bit like trying to teach someone about the broad structure of mathematics before they have learned basic arithmetic the approach in cliff more accurately reflects criminal law practice in a real world case the prosecutor and defense do not argue about mens rea or actus reus in the abstract instead the parties are focused on the elements of the specific crime's at issue when difficult mens rea or actus reus questions arise in practice it is in the context of the elements of a particular crime
