[The Design of Everyday Things](#)

2010-05-03 this book is about making machine learning models and their decisions interpretable after exploring the concepts of interpretability you will learn about simple interpretable models such as decision trees decision rules and linear regression later chapters focus

on general model agnostic methods for interpreting black box models like feature importance and accumulated local effects and explaining individual predictions with shapley values and lime all interpretation methods are explained in depth and discussed critically how do they work under the hood what are their strengths and weaknesses how can their outputs be

interpreted this book will enable you to select and correctly apply the interpretation method that is most suitable for your machine learning project
