materials victoria s the ultimate goal of many information access systems e g digital libraries the intranets is to  
provide the right content to their end users this content is increasingly a mixture of text multimedia and metadata and  
is formatted according to the adopted w3c standard for information repositories the so called extensible markup l  
guage xml whereas many of today s information access systems still treat do ments as single large text blocks xml  
offers the opportunity to exploit the internal structure of documents in order to allow for more precise access thus  
providing more specific answers to user requests providing effective access to xml based content is therefore a key  
issue for the success of these systems the aim of the inex campaign initiative for the evaluation of xml retrieval  
which was set up at the beginning of 2002 is to establish infrastructures xml test suites and appropriate  
measurements for evaluating the performance of information retrieval systems that aim at giving effective access to  
xml content more precisely the goal of the inex initiative is to provide means in the form of a large xml test collection
