requisite information is available you disregard the manual to your own peril the bible is the ultimate manual that deals with the creation of man and provides critical information regarding his purpose most things in genesis were created by the word of god he spoke and he saw however the crowning glory of his creation was made from previously existing raw materials god forming man from the dust of the ground is the clearest indication that god chose to build the first man god built the first man the original prototype fully mature full functional and capable of managing his creation all that the original man needed to be he knew the man was not made like a robot but was given the power of choice he could therefore of his own volition choose to do the right thing he was built to last and to function in all is god ordained capacities the choice to disobey god put man into a tailspin and affected his ability to function as originally designed the product was damaged and in need of restoration which was to eventually come in the person of christ many male related issues are a consequence of the fall of man the depths of depravity and alienation from good may appear to be spiralling out of control but all is not lost this book is intended to look at the original manual or user guide and to provide pertinent information that when applied will ultimately lead to restoration the authors are well intentioned that instead of cursing the darkness we choose to light a candle to show the way build a man has moved from an initiative or concept to the genesis of what is expected to become a movement we stand on the shoulders of our predecessors who have continually sought to address this critical issue within our various cultures we choose to at this late hour to add our voices in the belief that change is not only possible it is inevitable and we can salvage some good in the earth by the grace of god we have sought to contextualise the use of the manual to bring to the fore god s original design for man it is our considered viewpoint that what is wrong with man can be fixed by what is right in scriptures the topics covered are by no means exhaustive but are presented

with the view that if properly utilised can begin or continue the process towards building the man it is going to take a collaborative effort to obtain maximum impact let us not be overwhelmed by the sheer magnitude of the task but let us get to work at once we must first allow the manual to speak to us then begin to appropriate the changes in our lives and by extension reach out to so many others in need of help the book you are holding in your hands is not just a product geared towards information but rather a tool for transformation we begin with the question of identity clearly indicating that you were born a male but you must become a man you cannot become what you are ignorant of mans s identity is tied to his spirituality you cannot be divorced or alienated from god and expect to become what is foundational to your design the disconnect between man and god has opened a pandora s box type situation which can only be resolved by a return to the original purpose and intent the comprehensive guide to construction tolerances newly revised and updated how much may a steel frame be out of plumb what are the expected variations of a precast concrete panel what is required to successfully detail finish materials on masonry updating and expanding on its popular first edition the handbook of construction tolerances second edition remains the only comprehensive reference to the thousands of industry standard tolerances for the manufacture fabrication and installation of construction materials and components including all important accumulated dimensional variations covering new materials and techniques developed since the book was first published the second edition of this easy to use reference features more than 100 drawings illustrating the tolerance concepts new sections on measuring compliance with tolerance standards right of way construction autoclaved aerated concrete tilt up concrete panels interior stone wall cladding structural insulated panels decorative architectural glass laminated architectural flat glass and bent glass new guidelines on how to incorporate tolerance requirements in drawings and
