world war i is a rare book indy squadron dispatch world war i witnessed unprecedented growth and innovation in aircraft design construction and as the war progressed mass production each country generated its own innovations sometimes in surprising ways albatros fokker pfalz and junkers in germany and nieuport spad sopwith and bristol in france and britain this book focuses on the british approach to fighter design construction and mass production initially the french led the way in allied fighter development with their blieriot trainers then nimble nieuport scouts culminating with the powerful fast gun platforms as exemplified by the spads the spads had a major drawback however in that they were difficult and counter intuitive to fix in the field the british developed fighters in a very different way tommy sopwith had a distinctive approach to fighter design that relied on lightly loaded wings and simple functional box girder fuselages his camel was revolutionary as it combined all the weight well forward enabling the camel to turn very quickly but also making it an unforgiving fighter for the inexperienced the royal aircraft factory s se5a represented another leap forward with its comfortable cockpit modern instrumentation and inline engine clearly influenced by both spads and german aircraft each manufacturer and design team vied for the upper hand and deftly and quickly appropriated good ideas from other companies be they friend or foe developments in tactics and deployment also influenced design from the early reconnaissance planes to turn fighters finally planes that relied upon formation tactics speed and firepower advances were so great that the postwar industry seemed bland by comparison with this book you can confidently complete your hemi rebuild and get your car or truck back into action the modern hemi engine is lighter and stronger and offers far better drivability and performance than its predecessors however after hundreds of thousands of miles extreme use or high performance applications these rugged engines require a professional caliber rebuild long time mopar engineer racing coordinator and veteran author larry shepard delivers
