composition use composition and make composition your own in your photographs b p p of all the magical elixirs that make up a successful photograph composition is perhaps the most fundamental and at the same time the most elusive what makes a composition good it s hard to define exactly but we instinctively recognize good composition when we see it there is an undeniable emotional response when a composition resonates with and complements the subject matter of an image p p but traditional attempts to define good composition and to pass on rules for good compositional construction are often doomed to failure the truth is there are no hard and fast rules rules eliminate experimentation and spontaneity which are crucial for creating compelling dynamic and exciting compositions the best compositions contain an element of the unexpected expect the unexpected is perhaps the only viable rule of composition to create exciting compositions you must have a willingness to embrace serendipity and change as part of your artistic practice after all composition is a process not a result p p in i composition photography i photographer and bestselling author harold davis teaches you
