You Don't Have Problems, You're Just Bored! 2007 this book is the story of an incredible journey it is the odyssey of recovery this is a firsthand account of what it takes to overcome the greatest theft the stolen self this is the story of the recovery of a shattered spirit this is an account of what gauntlets must be run to experience the ultimate victory the victory of self actualization in the end all we search for is ourselves this book is about what ways what mazes what illusions what lies what inheritances we must live to break apart and free ourselves from we must own every tragic mystery in order to let each mysterious secret go the path to humility is the road less traveled from the words of robert frost this is an autobiography of a girl who took the road less traveled and it has made all the difference the great paradox is the gift is not the divine providence of freedom from the fear of being ones self the end result is not about being who we are the gift is the purpose that blooms from such manifest the benevolent opportunity to expose the path to someone else there is no end result as the purpose of life becomes apparent it expands as light outside the hard borders of materialism that light is love a governing energy little recognized and eternally sought this is a story of a girl who struggles through each level and into womanhood to find what love really is that flame so sought no longer a flicker so small its source is questionable is become a fire that is undeniable as the light and warmth it heaves out is seen and felt by the most blind and bitterly cold

Problem-Solving and Decision Making: Illustrated Course Guides 2012-04-06 this book describes how one can use the scientific method to solve everyday problems including medical ailments health issues money management traveling shopping cooking household chores etc it illustrates how to exploit the information collected from our five senses how to solve problems when no information is available for the present problem situation how to increase our

chances of success by redefining a problem and how to extrapolate our capabilities by seeing a relationship among heretofore unrelated concepts one should formulate a hypothesis as early as possible in order to have a sense of direction regarding which path to follow occasionally by making wild conjectures creative solutions can transpire however hypotheses need to be well tested through this way the scientific method can help readers solve problems in both familiar and unfamiliar situations containing real life examples of how various problems are solved for instance how some observant patients cure their own illnesses when medical experts have failed this book will train readers to observe what others may have missed and conceive what others may not have contemplated with practice they will be able to solve more problems than they could previously imagine
