paper highlights that one of the most dramatic developments in the 20th century was the entry of women into economic and political spheres previously occupied almost exclusively by men although women conflict in ukraine and russia s annexation of crimea has undoubtedly been a pivotal moment for policy makers and military planners in europe and beyond many analysts see an unexpected character in the conflict and expect negative reverberations and a long lasting period of turbulence and uncertainty the de legitimization of international institutions and a declining role for global norms and rules did these events bring substantial correctives and modifications to the extant conceptualization of international relations does the conflict significantly alter previous assumptions and foster a new academic vocabulary or does it confirm the validity of well established schools of thought in international relations has the crisis in ukraine confirmed the vitality and academic vigour of conventional concepts these questions are the starting points for this book covering conceptualisations from rationalist to reflectivist and from quantitative to qualitative most contributors agree that many of the old concepts such as multi polarity spheres of influence sovereignty or even containment are still cognitively valid yet believe the eruption of the crisis means that they are now used in different contexts and thus infused with different meanings it is these multiple conceptual languages that the volume puts at the centre of its analysis this text will be of great interest to environmental sustainability explore the contexts costs and benefits of a burgeoning population on our economic social and environmental systems the product of three years research in saudi arabia on what wahhabism means to those whose lives are governed by its formidably strict tenets american moviegoers have long turned to the hollywood western for reassurance in times of crisis during the genre s heyday the films of john ford howard hawks and henry hathaway reflected a grand patriotism that resonated with audiences at the end of world war ii the tried and true western was questioned by ford and george stevens during the cold war and in the 1960s directors like sam peckinpah and george roy hill retooled the genre as a commentary on american ethics during the vietnam war between the mid 1970s and early 1990s the western faded from view until the gulf war when kevin costner s dances with wolves 1990 and clint eastwood s unforgiven 1992 brought it back with moral complexities since 9 11 the western has seen a resurgence blending its patriotic narrative with criticism of america s place in the global community exploring such films as true grit 2010 and brokeback mountain 2005 along with television series like deadwood and firefly this collection of new essays explores how the western today captures the dichotomy of our times and remains important to the american psyche for decades governments have tried to foster industrial competitiveness and economic growth many instruments are known to work and many lessons have been learned however humanity is increasingly feeling the effects of natural resource depletion the rate of this depletion is deeply unsustainable and it is as of yet inextricably linked to economic growth and development to preserve acceptable living conditions for future generations while at the same time creating these conditions for millions of poor in the first place we must achieve a de linking of economic activity and resource depletion this book identifies the drivers and success factors of green industrial policy which seeks to reconcile the synergies and trade offs which exist between economic and environmental goals greening the economy is a goal which will require enormous investment as markets are currently failing to provide the required incentives for environmental sustainability governments must intervene and provide policy rents for investments in sustainability while withdrawing rents from polluting investments in this they will face the risk of political capture by interest groups and difficult choices among technologies rent management is therefore the heart of green industrial policy and the focus of this book on top of this the country examples provided in this volume focus on the emerging powers which will have an important influence the future of our planet however the lessons learned are valuable not only for countries introducing green industrial policies for the first time but also for those under pressure to reform existing policies this book will be of interest to students researchers and policymakers in the areas of energy policy sustainable development industrial economics and ecological economics globalised neo liberalism has produced multiple crises social ecological political in the past crises of global order have generated large scale social transformations and the current crises likewise hold a transformative promise social movements become a crucial barometer in signalling both the demise and rise of political formations and programs elite strategies framed as crisis management create their own disordering side effects experiments in movement strategy gain greater significance as do contending elite efforts at repressing managing or displacing the fall out in this book we investigate both movements and management in the face of crisis taking crisis and unanticipated consequences as a normal state of play the book enquires into the winners and losers from crisis and investigates the movement management nexus as it unfolds in particular localities as well as in broader contexts the book deals with some of the most pressing conflicts of our time and
