powerful effects persuasion has in contemporary society and enhances understanding of this ubiquitous communicative strategy the artists books made in russia between 1910 and 1915 are like no others unique in their fusion of the verbal visual and sonic these books are meant to be read looked at and listened to painters and poets including natalia goncharova velimir khlebnikov mikhail larionov kazimir malevich and vladimir mayakovsky collaborated to fabricate hand lithographed books for which they invented a new language called zaum a neologism meaning beyond the mind which was distinctive in its emphasis on sound as such and its rejection of definite logical meaning at the heart of this volume are close analyses of two of the most significant and experimental futurist books mirskontsa worldbackwards and vzorval explodity in addition nancy perloff examines the profound differences between the russian avant garde and western art movements including futurism and she uncovers a wide ranging legacy in the midcentury global movement of sound and concrete poetry the brazilian noigandres group ian hamilton finlay and henri chopin contemporary western conceptual art and the artist s book sound recordings of zaum poems featured in the book are available at getty edu calling attention to the visual materiality of the text this book attempts to halt linear reading trapping the eye in a field of letters which make a complex object on the page the writing refers continually to the visceral character of language literalizing metaphors of tongue breath and flesh the work both embodies and discusses language as a physical form one whose properties cannot be ignored by arriving at a disembodied content the format of this work invokes a reference to the carmina figurata of the renaissance works in which a sacred image was picked out in red letters against a field of black type so that a holy figure could be seen and meditated on in the process of reading the technique is reversed here with the red field of small type serving as a background in which large black letters are arranged like figures on the red ground this is a facsimile reprint of an original letterpress edition issued in 1989 of all the writings on theory and aesthetics ancient medieval or modern the most important is indisputably aristotle s poetics the first philosophical treatise to propound a theory of literature in the poetics aristotle writes that he will speak of comedy but there is no further mention of comedy aristotle writes also that he will address catharsis and an analysis of what is funny but he does not actually address any of those ideas the surviving poetics is incomplete until today here walter watson offers a new interpretation of the lost second book of aristotle s poetics based on richard janko s philological reconstruction of the epitome a summary first recovered in 1839 and hotly contested thereafter watson mounts a compelling philosophical argument that places the statements of this summary of the aristotelian text in their true context watson renders lucid and complete explanations of aristotle s ideas about catharsis comedy and a summary account of the different types of poetry ideas that influenced not only cicero s theory of the ridiculous but also freud s theory of jokes humor and the comic finally more than two millennia after it was first written and after five hundred years of scrutiny aristotle s poetics is more complete than ever before here at last aristotle s lost second book is found again must poetic form be as yeats demanded full sphere like single or can it accommodate the impurities yeats and his modernist generation found so problematic sixty years later these are still open questions questions to which marjorie perloff addresses herself in the essays collected here the first group of essays deals with pound s own poetics as that poetics related to two of his great contemporaries stevens and joyce as well as to the visual arts of his day the second group deals with the more technical aspects of verse and prose in the last four essays perloff takes up broader issues including the current pessimism about the state of poetry and the work of experimental poets and conceptual poets a survey of major poets and movements of american postmodern poetry includes more than four hundred poems by 103 poets one of our most important contemporary critics marjorie perloff has been a widely published and influential reviewer especially of poetry and poetics for over fifty years circling the canon volume ii focuses on the second half of her prolific career showcasing reviews from 1995 through her 2017 reconsiderations of jonathan culler s theory of the lyric and william empson s classic seven types of ambiguity in this volume perloff provides insight into the twenty first century literary landscape from revaluations of its leading poets and translations of european poetry from goethe to the brazilian

noigandres group and interart studies and performance art key issues of the past few decades such as the controversy over the role and function of poetry anthologies receive extended treatment and perloff frequently voices a minority view as in the case of the acclaimed british poet philip larkin diagnosis and management of adult congenital heart disease by drs gatzoulis webb and daubeney is a practical one stop resource designed to help you manage the unique challenges of treating long term adult survivors of congenital heart disease authored by internationally known leaders in the field this edition is the first that truly integrates anatomy and imaging technology into clinical practice and includes new chapters on cardiac ct for achd assessment critical and perioperative care anesthesia for achd surgery cardiac resynchronization therapy and transition of care congenital defects are presented with high quality illustrations and appropriate imaging modalities find all the information you need in one user friendly resource that integrates anatomy clinical signs and therapeutic options confidently make decisions aided by specific recommendations about the benefits and risks of surgeries catheter interventions and drug therapy for difficult clinical problems recognize and diagnose morphologic disorders with the help of detailed full color diagrams quickly find what you need thanks to easily accessible consistently organized chapters and key annotated references keep pace with the latest advancements including five new chapters on cardiac ct for achd assessment critical and perioperative care anaesthesia for achd surgery cardiac resynchronisation therapy and transition of care comply with the latest european society of cardiology esc and american college of cardiology acc practice guidelines integrated throughout the book for cardiac pacing and cardiac resynchronisation therapy see imaging findings as they appear in practice and discern subtle nuances thanks to new high quality images and illustrations integrates anatomy clinical signs and therapeutic options of congenital heart disease both in print and online
