france is the most visited country in the world it attracts millions of tourists most of whom come in search of beautiful architecture good food and fine art but appearances can be deceptive france is not only a place of culture and glamour

it also carries the bitter memories of violence division and broken promises in this arresting book emile chabal a leading specialist of contemporary france tells the story of a paradoxical country from the calamitous defeat by hitler s armies in 1940 to the spectacular gilets jaunes protests he explores the contradictions that have shaped french history over the last eighty years the picture that emerges is one of a nation struggling to reconcile its core political values with the realities of a diverse society listen to the author talk about the book with roxanne panchasi on the new books network podcast an introduction to computer engineering for babies learn basic logic gates with hands on examples of buttons and an output led it was the beginning of the gulf war i watched it on tv and did little else i was doing badly you see everything was going wrong i just awaited the end but then i met victorien salagnon a veteran of the great colonial wars of indochina vietnam and algeria a commander who had led his soldiers across the globe a man

with the blood of others up to his elbows he said he would teach me to paint he must have been the only painter in the french forces but out there no one cares about such things i cared though in return he wanted me to write his life story and so he talked and i wrote and through him i witnessed the rivers of blood that cut channels through france i saw the deaths that were as numberless as they were senseless and i began finally to understand the french art of war the arab spring began and ended with tunisia in a region beset by brutal repression humanitarian disasters and civil war tunisia s jasmine revolution alone gave way to a peaceful transition to a functioning democracy within four short years tunisians passed a progressive constitution held fair parliamentary elections and ushered in the country s first ever democratically elected president but did tunisia simply avoid the misfortunes that befell its neighbors or were there particular features that set the country apart and made it a special case in tunisia an arab anomaly

safwan m masri explores the factors that have shaped the country s exceptional experience he traces tunisia s history of reform in the realms of education religion and women s rights arguing that the seeds for today s relatively liberal and democratic society were planted as far back as the middle of the nineteenth century masri argues that tunisia stands out not as a model that can be replicated in other arab countries but rather as an anomaly as its history of reformism set it on a separate trajectory from the rest of the region the narrative explores notions of identity the relationship between islam and society and the hegemonic role of religion in shaping educational social and political agendas across the arab region based on interviews with dozens of experts leaders activists and ordinary citizens and a synthesis of a rich body of knowledge masri provides a sensitive often personal account that is critical for understanding not only tunisia but also the broader arab world an indispensable guide to understanding french culture
