been selected to become a representative and participant in the marine corps competition in arms program ciap throughout its history this program and the events conducted within the program all stress the same principles the development of proficient and combat ready marines through the practice and application of marksmanship fundamentals and shooting techniques success in requalification combat and competition rely on the shooter s ability to apply what he has learned in these environments the competitive shooter s goal over the coming weeks will ultimately be to win the match but the skills and knowledge that he receives will serve him and his fellow marines long after the competition ends and the medals are awarded the ciap s mission to develop and perpetuate effective shooters is the foundation on which each shooter in the marine corps may achieve success 2 overview this lesson will cover an introduction to the ciap to include history traditions objectives scope structure quotas comments air assault is a combat insertion unit using helicopters to transport and insert soldiers into battle provide medical evacuation provide close air support provide resupply operations it is usually a company or bat talion sized element the term air assault derives from two types of operations known as air mobility and vertical envelopment air mobility operations were developed by the german army during wwii in the 1930 s the us army soon adopted this method of offensive operations in 1941 using wooden gliders the glider was assisted into the air by being towed by a larger aircraft and then released the pilot had to navigate the large glider loaded with a team of infantry soldiers to the landing zone behind enemy lines at night and attempt to land safely once the pilot landed the glider he would join the mission as another infantry soldier with the team that he flew in although the gliders and techniques used were advanced for that time period they did pose some disadvantages once the aircraft was landed safely that team of soldiers were cut off from allied troops pilots had to be cross trained with infantry tactics so he could operate as both roles the air mobility glider was abandoned after wwii after the invention of the helicopter preface 1 november 2011 1 the sabalauski air assault school tsaas is a forscom tda unit that trains leaders and soldiers assigned to the 101st airborne division air assault as well as other army units and armed services in several courses by conducting the air assault and pathfinder courses the sabalauski air assault school develops technically proficient and confident soldiers capable of safely executing immediate and sustained air assault operations the school also trains and qualifies military rappel masters fast rope masters and spies masters in the application of infiltration and extraction techniques the school provides quality basic airborne refresher and jumpmaster refresher training to airborne capable units finally the school provides command and control of the 101st airborne division air assault screaming eagle parachute team 2 this handbook is designed to facilitate the mission of the school serving as a baseline of information for the air assault course it is not a substitute for applicable army regulations field manuals training circulars or technical manuals but it is designed to complement the guidance in these publications in the area of air assault operations the 101st airborne division air assault disclaims any responsibility for incidents occurring while applying these procedures 3 the proponent for this handbook is the commander of the sabalauski air assault school this 2011 update provides users with the latest doctrinal information regarding air assault operations users of
