[The Methods and Materials of Demography](#) 2013-10-22 the initial plans for this book

sprang from a late afternoon conversation in a hotel bar all three authors were attending the 1996 meeting of the population association of america in new orleans while nursing drinks and expounding on a variety of topics we began talking about our current research projects it so happened that all three of us had been entertaining the notion of writing a book on state and local population projections recognizing the enormity of the project for a single author we quickly decided to collaborate had we not decided to work together it is unlikely that this book ever would have been written the last comprehensive treatment of state and local population projections was don pittenger s excellent work projecting state and local populations 1976 many changes affecting the production of population projections have occurred since that time technological changes have led to vast increases in computing power new data sources the development of gis and the creation of the internet the procedures for applying a number of projection methods have changed considerably and several completely new methods have been developed

**The Cult of Smart** 2020-08-04 named one of vulture s top 10 best books of 2020 leftist firebrand fredrik deboer exposes the lie at the heart of our educational system and demands top to bottom reform everyone agrees that education is the key to creating a more just and equal world and that our schools are broken and failing proposed reforms variously target incompetent teachers corrupt union practices or outdated curricula but no one acknowledges a scientifically proven fact that we all understand intuitively academic potential varies between individuals and cannot be dramatically improved in the cult of smart educator and outspoken leftist fredrik deboer exposes this omission as the central flaw of our entire society which has created and perpetuated an unjust class structure based on intellectual ability since cognitive talent varies from person to person our education system can never create equal opportunity for all instead it teaches our children

that hierarchy and competition are natural and that human value should be based on intelligence these ideas are counter to everything that the left believes but until they acknowledge the existence of individual cognitive differences progressives remain complicit in keeping the status quo in place this passionate voice driven manifesto demands that we embrace a new goal for education equality of outcomes we must create a world that has a place for everyone not just the academically talented but we ll never achieve this dream until the cult of smart is destroyed
