Fibre Optic Communication Devices 2001-01-26 the book is intended to provide a definitive view of the field of humor research for both beginning and established scholars in a variety of fields who are developing an interest in humor and need to familiarize themselves with the available

body of knowledge each chapter of the book is devoted to an important aspect of humor research or to a disciplinary approach to the field and each is written by the leading expert or emerging scholar in that area there are two primary motivations for the book the positive one is to collect and summarize the impressive body of knowledge accumulated in humor research in and around humor the international journal of humor research the negative motivation is to prevent the embarrassment to and from the first timers often established experts in their own field who venture into humor research without any notion that there

already exists a body of knowledge they need to acquire before publishing anything on the subject unless they are in the business of reinventing the wheel and have serious doubts about its being round the organization of the book reflects the main groups of scholars participating in the increasingly popular and high powered humor research movement throughout the world an 800 to 1 000 strong contingent and growing the chapters are organized along the same lines history research issues main directions current situation possible future bibliography and use the authors definitive credentials not to promote an individual

view but rather to give the reader a good comprehensive and condensed view of the area
