***War and Words* 2016-05-11 the skills knowledge and understanding of the subjects involved in stem science technology engineering and mathematics are vital for all young people in an increasingly science and technology driven society this book looks at the purpose and pedagogy of stem teaching and explores the ways in which stem subjects can interact in the curriculum to enhance student understanding achievement and motivation by reaching outside their own classroom teachers can collaborate across subjects to enrich learning and help students relate school science technology and maths to the wider world packed with ideas and practical details for teachers of stem subjects this book considers what the stem subjects contribute separately to the curriculum and how they relate to each other in the wider education of secondary school students describes and evaluates different curriculum models for stem suggests ways in which a critical approach to the pedagogy of the classroom**

**laboratory and workshop can support stem for all students addresses the practicalities of introducing organising and sustaining stem related activities in the secondary school looks to ways schools can manage and sustain stem approaches in the long term this timely new text is essential reading for trainee and practising teachers who wish to make the learning of science technology engineering and mathematics an interesting motivating and exciting experience for their students**

***Challenge and Change for the Early Years***

**Workforce 2014-12-02 despite the vast body of texts inspired by warfare from the iliad to maus war writing is perpetually haunted by the notions of unrepresentability and inadequacy war and words examines the methods conventions and pitfalls of constructing verbal accounts of military conflict in literature and the media this multifocal study draws on a wide array of theoretical perspectives including feminism posthumanism masculinity trauma spatiality and media studies and brings together such diverse material as canonical literature war veterans testimonies imaginative fiction computer games english curricula and al qaeda s propaganda pieces in five consecutive sections spreading war propaganda reconstructing war spaces envisioning war gendering war and teaching war the contributors consider war in its manifold aspects as an ideological tool used for propaganda purposes as a spatial reconstruction performed for the critical reassessment of past conflicts as a projection or extrapolation of possible future conflicts and their**

**social repercussions as a political statement to deconstruct the oppressive nature of violence and finally as a didactic tool to foster empathy this collection will appeal primarily to academics specialising in english and american literature but also to those researching media gender and game studies**
