theoretical and more lengthy in discussion unforced errors are hands where the villain did something wrong and we were the lucky beneficiary these chapters show errors to avoid and how to benefit from these gifts when offered missions focus on off table study the missions are all created so that no computer analysis is required after years of coaching i have discovered many readers and students have the most success absorbing and actualizing the materials from this book with the use of physical cards and chips i have found this to be superior to just using poker software for range analysis and equity calculations donkey poker is a soup to nuts description of how to crush low stakes vegas no limit hold em volume 2 postflop teaches you everything you ever wanted to know about postflop strategy from the flop to the river it also covers other important topics such as variance bankroll management gto strategy moving up in stakes and exploiting live reads many statistics are discussed including those from online and live nlh statistics from vegas 1 2 and 2 5 games are published for the first time donkey poker teaches you how to crush the low stakes live no limit hold em games you will find in las vegas these donkey games play much differently than high stakes live games or even low stakes online games so the optimal strategies are often much different donkey games are filled with players who make the same mistakes over and over again and who are very exploitable donkey poker teaches a small ball brand of exploitive and low variance poker it teaches you what to do and why you should do it imagine the edge you would have if you could consistently
