reprint of the original first published in 1865 at the second session thirty eighth congress army of the potomac battle of petersburg this is the third edition of the leading textbook on legal ethics and the regulation of the legal profession in england and wales as such it maps the complex regulatory environment in which the legal profession in england and wales now operates it opens with a critical overview of professional ideals organisation power and culture and an examination of the mechanisms of professions exercised through governance regulation discipline and education the core of the book explores the conflict between duties owed to clients loyalty and confidentiality and wider duties to the profession third parties and society the final part applies lawyers ethics to dispute resolution and settlement litigation negotiation advocacy and alternative dispute settlement now laid out in a more accessible format and written in a more approachable style the book is ideal reading for those teaching and learning in the field of legal ethics in recent decades advances in biomedical research have helped save or lengthen the lives of children around the world with improved therapies child and adolescent mortality rates have decreased significantly in the last half century despite these advances pediatricians and others argue that children have not shared equally with adults in biomedical advances even though we want children to benefit from the dramatic and accelerating rate of progress in medical care that has been fueled by scientific research we do not want to place children at risk of being harmed by participating in clinical studies ethical conduct of clinical research involving children considers the necessities and challenges of this type of research and reviews the ethical and legal standards for conducting it it also considers problems with the interpretation and application of these standards and conduct concluding that while children should not be excluded from potentially beneficial clinical studies some research that is ethically permissible for adults is not acceptable for children who usually do not have the legal capacity or maturity to make informed decisions about research participation the book looks at the need for appropriate pediatric expertise at all stages of the design review and conduct of a research project to effectively implement policies to protect children it argues persuasively that a robust system for protecting human research participants in general is a necessary foundation for protecting child research participants in particular lethen brilliantly interprets new objectivity as a tactical response to the need for a code of conduct in an age of anxiety about values and normative judgments moving effortlessly between analysis of philosophical texts and literary works he charts an increasingly popular field of cultural studies how cultural discourses shape behavior one of the most original and daring contributions to weimar scholarship and to the study of modernity in general in a decade anton kaes university of california berkeley lethen is probably the most original and outstanding scholar writing in german today about weimar literature and culture he traces the figure of the cold persona as part of a broader discourse of anthropological ethical and aesthetic dimensions the book is written in a personal voice witty lucid and unpretentious miriam hansen university of chicago education in the responsible conduct of research typically takes the form of online
