nathalia holt presents a thorough account of the research that provides scientists with hope that a cure will one day be achievable and her empathy shines through in her prose this is as important a social history as it is a medical document the daily beast two patients each known in medical history as the berlin patient were cured of the hiv virus the two patients disparate cures came twelve years apart but nathalia holt an award winning scientist at the forefront of hiv research connects the molecular dots of these cases for the first time scientists are known to maintain a professional distance from those they study but sometimes scientists are not just investigators they are caregivers too cured illustrates that even in the era of high tech and big pharma the way doctors and patients communicate remains a critical ingredient in the advance of this science holt offers a kind of hope that the thirty four million people currently infected with hiv need and a story of ingenuity dedication and humanity that will inspire the rest of us a book about the major fallacies crippling modern medicine i was diagnosed with stage three colon cancer which was quickly spreading through my body i was told that if i did not have an operation to remove the tumor that i would surely die however if i consented to have the operation i would have had to wear a colostomy bag i was afraid of the outcome and refused besides there was no guarantee of success it was all chance taking i decided against the operation and opted to use cannabis oil and essiac tea i was not sure if they would cure me but i went for it within three months my cancer had vanished i did however have a short bout of chemo and radiation which made me very sick and both of these treatments are cancer causing carcinogenic two years later i am doing just fine and i am not wearing a colostomy bag and i am cancer free when i was diagnosed i felt that i had been given a death sentence i knew the fear the despondency the meaning of life s finality it was all very bad please if you have cancer or know someone no matter the stage please look into to the wonders of cannabis oil and essiac tea they might just do the job for you they did for me my book tells my story my fear and sadness it also gives many links to video programs about big pharma and the billions they make each year on selling cancer causing treatments chemo and radiation with little success also links to videos for all purpose good health and practices including testimonials of other cancer survivors both these substances cannabis oil and essiac tea are now making huge inroads into treating and curing cancer and gaining that well deserved recognition many years ago big pharma with the help of the fda and corrupted medical and political figures blocked all natural remedies that stood in competition to their profit making and gave the name of holistic medicine to quackery money is their business not you you are seen as pure profit nothing else learn well what is available to you to cure any illness take responsibility for your own health and just in that one step you will feel so much better on the way to a complete recovery nature heals any disease if our body gives us a sickness it can also cure it best wishes good health and a long and happy life john gabriel what if explaining an illness is one thing but understanding it is quite another what if illnesses have life meanings and not just scientific explanations and biological causes or cures what if the biology of the human body cannot be separated from the biography of the human being what if the life of the human body cannot be separated from the life of the human being in all its existential dimensions personal social and economic what if every bodily state is at the same time a state of consciousness and vice versa thus making nonsense of the separation between body and mind medical treatments on the one hand and psychological therapies on the other last but not least what if the illness is the cure and not something to be cured in a way that is clear and practically helpful to both lay readers patients and health professionals alike this book challenges the most basic assumptions of almost all forms of medicine modern or traditional scientific or spiritual namely that illness is something to be cured rather than being the cure to do so it draws on the work of illich heidegger and many others to introduces a fundamentally new approach to health and illness life medicine and life doctoring life doctoring is a new form of non biomedical therapy for serious and chronic illness instead of employing standard forms of medical testing and treatment the life doctor is there to help the individual come to an understanding of the ways their own particular illness is the cure how it is a potential source of new healing understandings of themselves and of a healing transformation of their lives life medicine is a new understanding of health and illness that does not separate science and life biology and biography the life of the human body and the life of the human being instead its focus is on the larger life context and specific life meanings that particular symptoms and illnesses hold for the individual patient for as marx wrote the idea of one basis for science and another for life is from the very outset a lie this lie unfortunately has dire consequences for as research by the medical establishment itself has confirmed conventional biomedical diagnosis and treatment through drugs and surgery is itself the leading cause of premature death ahead of both cancer and heart disease by offering an entirely new framework for understanding the essential nature of health and illness life doctoring can help patients understand the underlying sense of dis ease in their lives that lies behind their clinically diagnosed illness or disease in this way it can also serve to a prevent an individual s dis ease manifesting as clinical disease and b educate patients about the possible dangers and potentially sickness causing or iatrogenic effects of many standard forms of biomedical testing and treatment the continuing monopoly over knowledge of the human body that biomedicine claims has one basic reason namely that it is not actually science driven but money driven turning illness into a source of vast profits for big pharma and the corporate health industry as a whole many people are angered by the global trend toward the privatisation of medical care or else concerned about the rising costs yet the roots of this trend lie in the fact that illness itself has long been privatised seen as bearing no relation at all to the social and economic ills affecting the patient and to the sicknesses of society itself to argue that the illness is the cure is also to recognise that illness is also an expression of a fundamentally sick world through life medicine and life doctoring illness can also help us to recognise and respond in new ways to this world and its politics and in this way help to heal it the first task of the doctor is political michel foucault the birth of the clinic an archaeology of medical perception according to medical experts hundreds of thousands of people contract the herpes virus annually the same medical experts claim that there is no cure for the disease while this may be true for modern medical science it is not true where herbal medicine is concerned sufferers of herpes should not feel that their condition is a life sentence because it is not this maladies and the gene david fajgenbaum a former georgetown quarterback was nicknamed the beast in medical school where he was also known for his unmatched mental stamina but things changed dramatically when he began suffering from inexplicable fatigue in a matter of weeks his organs were failing and he was read his last rites doctors were baffled by his condition which they had yet to even diagnose floating in and out of consciousness fajgenbaum prayed for a second chance the equivalent of a dramatic play to second the game into overtime miraculously fajgenbaum survived only to endure repeated near death relapses from what would eventually be identified as a form of castleman disease an extremely deadly and rare condition that acts like a cross between cancer and an autoimmune disorder when he relapsed while on the only drug in development and realized that the medical community was unlikely to make progress in time to save his life fajgenbaum turned his desperate hope for a cure into concrete action between hospitalizations he studied his own charts and tested his own blood samples looking for clues that could unlock a new treatment with the help of family friends and mentors he also reached out to other castleman disease patients and physicians and eventually came up with an ambitious plan to crowdsource the most promising research questions and recruit world class researchers to tackle them instead of waiting for the scientific stars to align he would attempt to align them himself more than five years later and now married to his college sweetheart fajgenbaum has seen his hard work pay off a treatment he identified has induced a tentative remission and his novel approach to collaborative scientific inquiry has become a blueprint for disease sickness healing transformation placebo three basic causes of illness are reviewed and their associated cure processes cure is a verb is a cure holistic or reductionist how can we tell the concepts of holistic and reductionist treatments are clearly defined such that we can easily determine if any treatment is holistic reductionist or a blend is prevention better than cure umm not when we are sick in addition because many illnesses cause secondary diseases a cure is often the best preventative the science of cure is a condensation expansion and exploration of the concepts introduced be truly healed take the first step now read on and blessings on the journey andy lazris md is a practicing primary care physician who experiences the effects of medicare policy on a daily basis as a result he believes that the way we care for our elderly has taken a wrong turn and that medicare is complicit in creating the very problems it seeks to solve aging is not a disease to be cured it is a life stage to be lived lazris argues that aggressive treatments cannot change that fact but only get in the way and decrease quality of life unfortunately medicare s payment structure and rules deprive the elderly of the chance to pursue less aggressive care which often yields the most humane and effective results medicare encourages and will pay more readily for hospitalization than for palliative and home care it encourages and pays for high tech assaults on disease rather than for the primary care that can make a real difference in the lives of the elderly lazris offers straightforward solutions to ensure medicare s solvency through sensible cost effective plans that do not restrict patient choice or negate the doctor patient relationship using both data and personal stories he shows how medicare needs to change in structure and purpose as the population ages the physician pool becomes more specialized and new medical technology becomes available curing medicare demonstrates which medical interventions medicines tests procedures work and which can be harmful in many common conditions in the elderly the harms and benefits of hospitalization the current culture of long term care and how medicare often promotes care that is ineffective expensive and contrary to what many elderly patients and their families really want on our first day of school robert and i stood at the designated stop at hevers avenue with our mothers and that s when we met for the very first time we were five years old so began a lifelong friendship that fourteen years later would result in the formation of the cure a quintessential post punk band whose albums such as three imaginary boys pornography and kiss me kiss me kiss me remain among the best loved and most influential of all time as two of the first punks in the provincial english town of crawley lol tolhurst and robert smith didn t have it easy outsiders from the start theirs was a friendship based initially on proximity and a shared love of music from the punk that was raging in nearby london to the groundbreaking experimentation of david bowie s berlin trilogy first known as the easy cure they began playing in pubs and soon developed their own unique style and approach to songwriting resulting in timeless songs that sparked a deep sense of identification and empathy in listeners songs like boys don t cry just like heaven and why can t i be you spearheading a new subculture dubbed goth by the press the music of the cure was not only accessible but also deeply subversive challenging conventional notions of pop music and gender roles while inspiring a generation of devoted fans and a revolution in style cured is not only the first insider account of the early days of the band it is a revealing look at the artistic evolution of the enigmatic robert smith the iconic lead singer songwriter and innovative guitarist at the heart of the cure a deeply rebellious sensitive tough and often surprisingly normal young man smith was from the start destined for stardom a fearless non conformist and provocateur who soon found his own musical language through which to express his considerable and unique talent but there was also a dark side to the cure s intense and bewildering success tolhurst on drums and keyboards was nursing a growing alcoholism that would destroy his place in the cure and nearly end his life cured tells the harrowing and unforgettable story of his crash and burn recovery and rebirth intensely lyrical and evocative gripping and unforgettable cured is the definitive story of a singular band whose legacy endures many decades hence told from the point of view of a participant and eyewitness who was there when it happened and even before it all began cure there are thousands of books about cures most are bogus most contain only false cures some contain cures can you tell the difference this is the book about cure search high and low there is no other book about the concept of cure the breadth and depth of cure the basic types of cures based on the fundamental causes of illness cure complete cure elementary cure complex cure compound cure partial cure temporary cure remission cure of chronic illness how are they defined how are they distinguished from each other how might we recognize a cure how can we recognize cured how can we recognize a temporary cure or a partial cure and distinguish between it and a permanent cure or a complete cure do we cure illnesses diseases patients causes of illness or something else understanding the differences recognizing cures and cured can only begin with a fundamental understanding of the concepts of cure as presented in depth in this book a calculus of curing no current medical reference text contains a definition of cure much less a clear scientific medical definition many medical dictionaries do not contain entries for the word cure cure cures cured and curing are not defined in current medical practice this book is the first step a comprehensive step to an understanding of cure tired of watching her husband suffer with lifelong asthma and disgusted with western doctors laughing literally when he asked about an asthma cure or natural options linda rubright set out to find her own answers and found 14 people who cured asthma the 14 former asthmatics she found had completely eliminated all of their asthmatic symptoms and need for any asthma medication for themselves their children and their patients and not just for hours or days but for months years and decades the asthma cures these 14 people used involved many things including lifestyle improvements diet changes alternative therapies supplements and more some needed to work with unresolved grief others used some very unconventional yet highly effective alternative therapies some took days months or years to cure their asthma one woman cured her asthma in 90 minutes not one used any gimmicks in finding their asthma cure regardless of their individual journeys to find an asthma cure they all arrived at the same destination a life without asthma author lisa levan suffered with psoriasis for years her physicians prescribed numerous medications to treat her condition but while these products made her psoriasis disappear in one area the symptoms would flare up in another place she soon learned that traditional treatment did not treat the condition at all it only covered up the symptoms not only that it often caused dangerous even life threatening side effects that were worse than the original symptoms ms levan then decided to put her experience as a research biochemist to work to find a cure for her psoriasis in the psoriasis cure she presents her remarkable discovery the psoriasis cure details lisa levan s drug free therapy for eliminating both the symptoms and root causes of psoriasis the book begins with a clear explanation of exactly what psoriasis is and what its possible causes are it then examines how today s commonly prescribed treatments for psoriasis may adversely affect your health the book goes on to provide you with guidelines for levan s complete program to prevent your symptoms for returning this book does not offer a quick fix for psoriasis what the psoriasis cure does provide is a commonsense approach that if followed will help you rid your body of this condition with virtually no harmful side effects isn t it time to take control of your psoriasis with the psoriasis cure in hand you can our current theory of cure isn t working when did it stop today we can t cure most diseases when cured few can be proven cured even the common cold the flu and measles i ve had them all cured over 99 percent of cases are cured while medical theory there is no cure for the same is true for many other diseases we need a theory of cure that encompasses every curable medical condition or disease this book is the first step on that path cure is defined by cause every curable medical condition has a present cause that when addressed results in a cure of course many diseases are compound and complex having multiple causes often causing other diseases themselves there is plenty of complexity to study cure we simplify first and then build our understanding from a solid foundation there are exactly two basic types of illness causes resulting in exactly two types of cures an element of illness has a single cause the cause of an illness might be found in diet body mind spirit community or environment of the afflicted the illness element is cured when the cause has been successfully addressed once an illness is cured that cure is permanent no cure is permanent if the cause occurs again a new illness might occur this logic applies to every cure cures are forward movements in life we can only go forward in life not backwards no cure is perfect perfect cures are a myth real cures are real both healing and curing function by addressing the basic causes of illness healing cures are unconscious intentional actions that successfully address the cause of an illness no healing cure is perfect even when the results are better than before curing consists of intentional personal community and medical actions that address the cause of an illness caring is attention by self and community to address the signs and symptoms of disease to aid and facilitate healthy tolerance of the signs and symptoms of disease and to aid and facilitate cures when it comes to disease who beats the odds and why when it comes to spontaneous healing skepticism abounds doctors are taught that miraculous recoveries are flukes and as a result they don t study those cases or take them into account when treating patients enter dr jeff rediger who has spent over 15 years studying spontaneous healing pioneering the use of scientific tools to investigate recoveries from incurable illnesses dr rediger s research has taken him from america s top hospitals to healing centers around the world and along the way he s uncovered insights into why some people beat the odds in cured dr rediger digs down to the root causes of illness showing how to create an environment that sets the stage for healing he reveals the patterns behind healing and lays out the physical and mental principles associated with recovery first we need to physically heal our diet and our immune systems next we need to mentally heal our stress response and our identities through rigorous research dr rediger shows that much of our physical reality is created in our minds our perception changes our experience even to the point of changing our physical bodies and thus the healing of our identity may be our greatest tool to recovery ultimately miracles only contradict what we know of nature at this point in time cured leads the way in explaining the science behind these miracles and provides a first of its kind guidebook to both healing and preventing cause and cure it describes how these elements are combined to create complex and compound illnesses and how those illnesses are cured with complex and compound cures the distinctions between illnesses and cases of disease chronic disease disorder medical condition and disability is clearly defined to aid in finding cures and recognizing cures when they are found the elements of cure can be used as a theoretical foundation to deconstruct any case of a disease into a set of illnesses and to begin and track the cure process essay in the subject sociology medical care language english abstract according to who health is the complete state of physical mental and social well being and not merely absence of disease or infirmity who 2010 when an individual is claimed to be healthy it is considered the entire being is in a state of wellness and not merely absence of pathogens acting against one s physical being cure and healing although they may be interchanged have different meanings if taken in their rightful context this misconception extend also to disease sickness and illness when individuals experience disease there is always a tendency to think in obsolete terms of being curable and incurable when we talk of curing we talk of the restoration of health by eliminating the symptoms that characterise a disease healing on the other hand calls for the restoration of wholeness healing is an integrative process that go beyond the physical but also include mental emotional and spiritual vitality and wellness whilst cure could be instant healing usually takes time medicine has specialists in hundreds of fields publishes journals with the latest research in neurology cardiology urology hematology and many more it studies and publishes more general journals regarding family medicine emergency medicine rehabilitation and more there are medical researchers and journals for infectious diseases mental diseases physical disabilities nutritional diseases and many more textbooks and reference books in each field provide historical information and latest research findings for use by students practitioners and researchers medical research studies treatments what medical journal covers the latest research into cures what are the authoritative medical books about cure that also document the history of cure there are books claiming to cure every disease but none have medical authority there are books claiming to cure specific diseases those too have no medical authority cured is not defined all claims of cures and cured are considered to be quack cures maybe cures are there hidden in the current journals no cured is medically defined and can be tested for some infectious diseases cured is not defined for non infectious diseases there is no medical test of cured for any non infectious disease not one anyone who claims to cure to have cured or to have been cured of alzheimer s arthritis bronchitis cancer chron s depression diabetes epilepsy fibromyalgia gout heart disease hypertension inflammatory bowel disease kidney disease and many many more is considered a quack cured cannot be tested much less proven most doctors in these fields refuse to use the word cure and advise their administrative and nursing staff to do the same cured is not defined for chonic diseases not defined for mental condition there is no test of cured for any disease cured by health there is no cure for the common cold it s not because we never cure a common cold no medicine can cure the common cold so cured is not recognized if you have cured your common cold influenza measles or mumps with health no cure can be proven even when cured is obvious we have thousands of fundraising projects claiming to search for the cure for many diseases few research studies contain a testable definition of cured if the researchers encounter a cure it is outside of the parameters of the study not acknowledged or counted there are no statistics for cured in any field of medicine officially nobody studies cures can we cure cancer can we tell when a cancer is cured cancer is a horribly complex disease a collection of diseases defined by a single statement an uncontrolled growth of cells every individual case of a cancer is different every patient is different living in a unique community consuming a unique diet which changes over time participating in unique activities the concept of cure is also complex a case of cancer might be simple consisting of a single tumor easily removed or of a cancer that has metastasized spreading throughout tissues and organs a single case of cancer can cause physical damage to specific tissues or body parts or it can spread so far that it disables an organ or bodily function how can we cure and know that any case of cancer is cured how can we be certain that any non infectious disease has been cured today there is no definition of cured we simply cannot it s time to define cured for every disease the first steps are not difficult as we progress it will get more complex let s begin an illness is cured when the cause has been successfully addressed an illness is cured when healing has completed an illness is cured when no more medicines are required thus we begin a study of cure cures curing and cured this book cure is the start of our journey let s create a science of cure to your health tracy
