A Globalised Visual Culture? 2015-09-11 Chase's calendar of events is the most comprehensive and authoritative reference available on special events, holidays, federal and state observances, historic anniversaries, astronomical phenomena, and more, published since 1957. Chase's is the only guide to special days, weeks, and months. *The Big Cheat* 2022-10-15 Modern states increasingly seek to regulate religious expression, practice, and discourse. This is profoundly evident at many levels of Islamic policy interaction, from debates about the banning of the Muslim face veil in Europe to civic re-education programmes for Muslim citizens in China. Governance of Islam in Pakistan provides a systematic account of how interactions between multiple public and private bodies direct the regulation and standardisation of Islam in one of the largest Muslim majority states in the world. Analysis centres on the institutional development

of the Council of Islamic Ideology, a constitutional body tasked with issuing advice to the executive and legislature about the compatibility of laws with Islamic principles. Based on archival material that has been subject to little scholarly attention and interviews with Council members and staff of other state bodies, Sarah Holz proposes governance as an analytical framework to study the negotiation of religious expression, practice, and discourse in contrast to the established Islamisation narrative, which generally labels such religious institutions as mere rubberstamps in the process of policy-making. The study of governance offers an alternative approach that enables examination of the dynamic competition and cooperation among multiple actors through collective interaction. The Council and other relevant bodies are active players in the governance of Islam. Insights gained from analysis of the ideational, structural, and functional evolution of the Council offers a Global South perspective on liberal democratic

ideas about the functionality of the modern state and its institutional structure issues of economic cultural and local international political influence bear strongly in governance analysis engagement with the governance policy tool has applicability across the social sciences but is particularly relevant for south asian near and middle east studies

The Great Leveler 2017-01-31 a long time chief data scientist at amazon shows how open data can make everyone not just corporations richer every time we google something facebook someone uber somewhere or even just turn on a light we create data that businesses collect and use to make decisions about us in many ways this has improved our lives yet we as individuals do not benefit from this wealth of data as much as we could moreover whether it is a bank evaluating our credit worthiness an insurance company determining our risk level or a potential employer deciding whether we get a job it is likely that this data will be used against us rather than for us in data for the people andreas weigend draws on his years as a consultant for commerce education healthcare

travel and finance companies to outline how big data can work better for all of us as of today how much we benefit from big data depends on how closely the interests of big companies align with our own too often outdated standards of control and privacy force us into unfair contracts with data companies but it doesn't have to be this way weigend makes a powerful argument that we need to take control of how our data is used to actually make it work for us only then can we the people get back more from big data than we give it big data is here to stay now is the time to find out how we can be empowered by it

[Debating Tudor policy in sixteenth-century Ireland](#) 2023-03-21 traces how the day has served as a key organizing concept in roman

culture and beyond how did ancient romans keep track of time what constituted a day in ancient rome was not the same twenty four hours we know today in the ordered day james ker traces how the day served as a key organizing concept both in antiquity and in modern receptions of ancient rome romans used the story of how the day emerged as a unit of sociocultural time to give order to their own civic and imperial history ancient literary descriptions of people s daily routines articulated distinctive forms of life within the social order and in the imperial period and beyond outsiders such as early christians in their monastic rules and modern antiquarians in books on daily life ordered their knowledge of roman life through reworking the day as a heuristic framework scholarly interest in roman time has recently moved from the larger unit of the year and calendar to smaller units of time especially in the study of sundials and other timekeeping technologies of the ancient

mediterranean through extensive analysis of ancient literary texts and material culture as well as modern daily life handbooks ker demonstrates the privileged role that small time played and continues to play in roman literary and cultural history ker argues that the ordering of the day provided the basis for the organizing of history society and modern knowledge about ancient rome for readers curious about daily life in ancient rome as well as for students and scholars of roman history and latin literature the ordered day provides an accessible and fascinating account of the makings of the roman day and its relationship to modern time structures

Oxford Textbook of Children's Sport and Exercise Medicine 2018-03-15 citizenship is a major feature of contemporary national and international politics but rather than being a modern phenomenon it is in fact a legacy of ancient greece the concept of membership of a community and participation in its social and

political life first appeared some three millennia ago but only towards the end of the fourth century bc did aristotle offer the first explicit statement about it though long accepted this definition remains deeply rooted in the philosophical and political thought of the classical period and probably fails to account accurately for either the preceding centuries or the dynamics of emergent cities as such historians are now challenging the application of the aristotelian model to all greek cities regardless of chronology and are looking instead for alternative ways of conceiving citizenship and community focusing on archaic greece this volume brings together an array of renowned international scholars with the aim of exploring new routes to archaic greek citizenship and constructing a new image of archaic cities which are no longer to be considered as primitive or incomplete classical poleis the essays collected here have not been tailored to endorse any specific view with each contributor bringing his

or her own approach and methodology to bear across a range of specific fields of enquiry from law cults and military obligations to athletics commensality and descent the volume as a whole exemplifies the living diversity of approaches to archaic greece and to the greek city combining both breadth and depth of insight with an opportunity to venture off the beaten track

My Calamity Jane 2017-11-03 background injuries are common in professional football especially during matches and they cause suffering for players in both the short and the long term it is therefore important to try to prevent these injuries one of the most important steps in injury prevention is to fully understand the different risk factors that contribute to these injuries aim the aim of this thesis was therefore to investigate several match related factors that have been suggested to be important for the risk of sustaining injuries during professional football matches methods the thesis consists of four papers and all analyses are based on data gathered during a large scale prospective cohort study that has been running since 2001 the uefa elite club injury study medical teams from 61 clubs have been involved in this study and they have prospectively gathered data about football exposure and injuries for their first team players associations between the following factors and

injuries have been analysed match characteristics in terms of match venue match result and competition match congestion both short and long term and at team and individual player level number of completed training sessions between return to sport after an injury and the first match exposure results all match characteristics studied were shown to be associated with injury rates with higher injury rates during home matches compared with away matches in matches that were lost or drawn compared with matches won and in domestic league and champions league matches compared with europa league and other cup matches it was also shown that injury rates muscle injury rates in particular were higher if the recovery time between matches was short this association between match congestion and injury rates was shown when match congestion was considered at both team and individual player level finally the odds of injury during the first match exposure after a period of absence due to injury

was found to be higher if players had completed few training sessions between return to sport and their first match conclusion there are several match related risk factors that contribute to the injury rate during professional football matches a better understanding of these risk factors will help teams to make better estimations of the injury risks to which players are exposed in different situations e g during periods of match congestion and when players return to sport after an injury knowledge about risk factors will also offer the possibility of reducing the number of injuries for football teams by addressing them with appropriate measures

Asian Migration and Education Cultures in the Anglosphere 2018-09-18 are mass violence and catastrophes the only forces that can seriously decrease economic inequality to judge by

thousands of years of history the answer is yes tracing the global history of inequality from the stone age to today walter scheidel shows that it never dies peacefully the great leveler is the first book to chart the crucial role of violent shocks in reducing inequality over the full sweep of human history around the world the four horsemen of leveling mass mobilization warfare transformative revolutions state collapse and catastrophic plagues have repeatedly destroyed the fortunes of the rich today the violence that reduced inequality in the past seems to have diminished and that is a good thing but it casts serious doubt on the prospects for a more equal future an essential contribution to the debate about inequality the great leveler provides important new insights about why inequality is so persistent and why it is unlikely to decline anytime soon
