Apache Spark 2.x Machine Learning Cookbook The New Mediterranean Diet Cookbook Children's Books in Print New York Magazine

Apache Spark 2.x Machine Learning Cookbook 2017-09-22 simplify machine learning model implementations with spark about this book solve the day to day problems of data science with spark this unique cookbook consists of exciting and intuitive numerical recipes optimize your work by acquiring cleaning analyzing predicting and visualizing your data who this book is for this book is for scala developers with a fairly good exposure to and understanding of machine learning techniques but lack practical implementations with spark a solid knowledge of machine learning algorithms is assumed as well as hands on experience of implementing ml algorithms with scala however you do not need to be acquainted with the spark ml libraries and ecosystem what you will learn get to know how scala and spark go hand in hand for developers when developing ml systems with spark build a recommendation engine that scales with spark find out how to build unsupervised clustering systems to classify data in spark build machine learning systems with the decision tree and ensemble models in spark deal with the curse of high dimensionality in big data using spark implement text analytics for search engines in spark streaming machine learning system implementation using spark in detail machine learning aims to extract knowledge from data relying on fundamental concepts in computer science statistics probability and optimization learning about algorithms enables a wide range of applications from everyday tasks such as product recommendations and spam filtering to cutting edge applications such as self driving cars and personalized medicine you will gain hands on experience of applying these principles using apache spark a resilient cluster computing system well suited for large scale machine learning tasks this book begins with a quick overview of setting up the necessary ides to facilitate the execution of code examples that will be covered in various chapters it also highlights some key issues developers face while working with machine learning algorithms on the spark platform we progress by uncovering the various spark apis and the implementation of ml algorithms with developing classification systems recommendation engines text analytics clustering and learning systems toward the final chapters we ll focus on building high end applications and explain various unsupervised methodologies and challenges to tackle when implementing with big data ml systems style and approach this book is packed with intuitive recipes supported with line by line explanations to help you understand how to optimize your work flow and resolve problems when working with complex data modeling tasks and predictive algorithms this is a valuable resource for data scientists and those working on large scale data projects
